

Land Feasibility Report — KILLIAN RD (Stanley, NC)

Feasibility Rating: **Good** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **424.03-acre vacant parcel** at KILLIAN RD, Stanley, NC (Parcel ID **172671**, PIN 4610-33-7807), zoned **R-1 — R-1 Single Family Limited** under Gaston County. Recorded owner: **GASTON COUNTY**.

Buildability verdict: the parcel is **moderate** — outside the FEMA special flood hazard area, with road frontage and a max slope of **15.4%** (center elevation 210.1 m). Zoning permits **Single-Family** residential use at a minimum lot of **15,000 sq ft** and a density of 2.0 du/ac.

Subdivision potential: at the current district standards the tract yields **923 buildable lots** (gross 1,231 before 75% infrastructure efficiency).

Overall rating: **Good — Pursue.**

2. Property Overview

Field	Value
Address	KILLIAN RD, Stanley, NC 28164
Parcel ID / PIN	172671 / 4610-33-7807
Acres	424.03
Assessed land value	\$3,683,090
Total parcel value	\$0
Property class (code)	4010
Owner	GASTON COUNTY
Jurisdiction	Gaston County

3. Parcel Verification

Field	Value
Parcel ID	172671
PIN	4610-33-7807
Owner of record	GASTON COUNTY
Mailing address	PO BOX 1578, GASTONIA, NC 28053-1578
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District:** **R-1 — R-1 Single Family Limited**
- **Jurisdiction:** Gaston County · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached, modular home, accessory uses
- **Allowed building types:** Single-Family

Dimensional standards (adopted):

Standard	Value
Minimum lot area	15,000 sq ft

Standard	Value
Minimum lot width	40 ft
Density	2.0 du/ac
Maximum height	45 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	20 ft
- Minimum lot area is 15,000 sq ft for lots served by both public water and sewer; larger minimums apply where septic/well is used.	
- Minimum lot width applies only to lots containing a detached single-family dwelling (40 ft).	
- Maximum building height: 3 stories, not to exceed 45 ft.	
- <i>Source (adopted standards): Gaston County Unified Development Ordinance, Ch. 8 (Dimensional Standards) — https://cms3.revize.com/revize/gastoncounty/Documents/planning/UDO2018/0201Ch8_Suppl1017.pdf</i>	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Gaston County 2035 Comprehensive Land Use Plan — future land use designations: Rural (49%), Rural Community (5%), Suburban Development (6%), Incorporated Areas & ETJ (38%). Verify the parcel's specific designation on the adopted FLU map.
- *Source: <https://cms3.revize.com/revize/gastoncounty/Documents/planning/gaston-county-2035-comprehensive-land-use-plan.pdf>*
- The parcel's specific designation on the adopted FLU map determines whether the current R-1 district is consistent with the county's long-range plan. A Rural / Rural Community designation supports the existing low-density single-family district and signals no near-term upzoning pressure; a Suburban or ETJ designation would provide a policy basis for higher-density residential entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** R-1 (R-1 Single Family Limited) at 2.0 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	424.03 acres
Minimum lot size	15,000 sq ft
Gross (theoretical) lots	1,231
Infrastructure efficiency	75%
Net buildable lots	923
- Process: Gaston County Building & Development Services — subdivision/plat review \$300 (minor, major, exempt, non-exempt; includes initial + one re-review); final plat review/approval \$300; plat re-review \$100.	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale. <i>Source: https://www.gastongov.com/DocumentCenter/View/7877/FY26-Building-and-Development-Services-Fee-Schedule-PDF</i>	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 40 ft; setbacks front 20 / side 5 / rear 20 ft), the NC Building Code, and Gaston County building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE WITH ENGINEERING** — max slope 15.4% (15–25%) adds grading/retaining/earthwork cost; otherwise clean.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **15.4%** · Center elevation: **210.1 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities (county)	\$1,958–\$2,706 (3/4" residential)
Sewer tap	Two Rivers Utilities (county)	\$1,867–\$2,577 (4" residential)
Building permit	Gaston County	\$990 (county building permit minimum, new SFR)
Taps + permit subtotal	—	\$4,815–\$6,273
- <i>Source: Two Rivers Utilities (county) fee schedule (https://www.cityofgastonia.com/government/departments/public-works/two-rivers-utilities)</i>		
- Well / septic alternative (if no public service at the address): budget a private well (~\$6,000–\$12,000 drilled + pump) and a conventional septic system (~\$5,000–\$15,000 installed incl. perc test) — confirm local costs before relying on these ranges.		
- ⚠ Availability ≠ a tap: confirm an active water/sewer main with capacity exists at the address before budgeting the tap fees above.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Gaston County Schools — 58 schools, ~30,400 students; ranked #181–186 of ~320 NC districts (bottom 50%); 34 of 54 schools earned an A/B/C grade.
- Source: <https://www.publicschoolreview.com/north-carolina/gaston-county-schools-school-district/3701620-school-district>
- Commute to Charlotte metro employment is roughly 25–35 minutes via I-85/US-321; Gastonia submarket jobs are closer.

16. Market Analysis

Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	0	—	—	—
5 mi	0	—	—	—
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 67 closed sales.				

17. Market Saturation & Absorption by Product Type

Product type	Absorption	Days on market	Months of supply
Single-family detached	Strong (seller's-to-balanced)	~26–44	~3.5
Townhome / attached	Moderate	~30–45	~3.5–4
Condo	Soft	~40–60	~4.5–5
Multifamily / rental	Rental-demand driven	n/a	n/a
- Gaston County (mid-2026): median ~26 days on market, ~3.5 months of supply, ~334 homes sold/mo, avg sale ~\$401k — a balanced-to-seller's market.			
- Sources: https://ruizreport.com/@zac/gaston-nc/ (Ruiz Report); Redfin Gaston County (Jan 2026, median ~\$314K, 94-day DOM); Houzeo (4.8-mo supply).			
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; avoid condo product here.			

18. Interest Rate & Financing Environment

- Current 30-yr fixed: **6.5%–6.7% (30-yr fixed, 2026-08-14; Bankrate/WSJ)**. Trend: **steady-to-slightly-lower** this week. Source: <https://www.bankrate.com/mortgages/30-year-mortgage-rates/>.
- Effect on demand: a ~6.5% rate supports affordability for the median ~\$314K Gaston home (P&I ≈ \$1,585/mo before taxes/insurance); each 0.25% move changes that payment by roughly \$50/mo, directly pacing absorption and a builder's sell-through.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria: verified CLOSED sales within the search radius, matched to the parcel's permitted residential forms (Single-Family), nearest first (driving distance via Google Distance Matrix). All **67** sold comps:

Bottom Line: 67 verified new-construction closings averaging **\$463,056** (avg **\$198/sqft**), ranging \$388,000–\$547,899. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- New-construction hard cost (Charlotte metro): **\$165–\$220/sq ft (Charlotte metro production–mid-range, 2026)**. Source: <https://www.costtobuildhouse.com/cost-per-square-foot-to-build-a-house-in-north-carolina>.
- Itemized hard-cost baseline below (the app's Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home ≈ \$250,000 ≈ \$156/sq ft); localize each line to current Charlotte-area prices and scale to the planned home size / the comps' typical sq ft.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000

Line item	Baseline (1,600 sq ft)
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (R-1), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

- No qualifying recent-build comps to derive the 8–15% land band; base valuation on comparable vacant-land sales (Google Search) and the assessor land value, reconciled with the residual pro forma in Section 23 when available.

23. Builder/Developer Profitability Analysis

- Insufficient comps for a residual-land-value pro forma.

24. Risk Assessment

Risk	Severity	Mitigation
Slope (15.4%) adds grading/earthwork cost	Medium	Budget site-work adders; obtain a topographic survey before offer.
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
Comps reflect a balanced market (~26–44 day DOM)	Low	Stress-test ARV at the 7% rate scenario.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Good**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~923 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 67-comp market, and subdivision lot yield.

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning).

Land Feasibility Report — OLD NC 27 HWY (Mount Holly, NC)

Feasibility Rating: **Excellent** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **315.60-acre vacant parcel** at OLD NC 27 HWY, Mount Holly, NC (Parcel ID **205074**, PIN 3588-86-7557), zoned **R-1 — R-1 Single Family Limited** under Gaston County. Recorded owner: **CATAWBA LANDS CONSERVANCY**.

Buildability verdict: the parcel is **buildable** — outside the FEMA special flood hazard area, with road frontage and a max slope of **5.0%** (center elevation 223.8 m). Zoning permits **Single-Family** residential use at a minimum lot of **15,000 sq ft** and a density of 2.0 du/ac.

Subdivision potential: at the current district standards the tract yields **687 buildable lots** (gross 916 before 75% infrastructure efficiency).

Market anchor: 48 verified sold new-construction comps average **\$384,438**; the 8–15% land-value band is **\$30,755–\$57,666 per finished lot** (\$21,128,685–\$39,616,542 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-238,431/lot** (-62.0% of ARV) — cross-checked in Section 23.

Overall rating: Excellent — Pursue.

2. Property Overview

Field	Value
Address	OLD NC 27 HWY, Mount Holly, NC 28120
Parcel ID / PIN	205074 / 3588-86-7557
Acres	315.60
Assessed land value	\$1,495,030
Total parcel value	\$0
Property class (code)	4100
Owner	CATAWBA LANDS CONSERVANCY
Jurisdiction	Gaston County

3. Parcel Verification

Field	Value
Parcel ID	205074
PIN	3588-86-7557
Owner of record	CATAWBA LANDS CONSERVANCY
Mailing address	2400 PARK RD LOWR, CHARLOTTE, NC 28203-6140
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District: R-1** — R-1 Single Family Limited
- **Jurisdiction:** Gaston County · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached, modular home, accessory uses
- **Allowed building types:** Single-Family

Dimensional standards (adopted):

Standard	Value
Minimum lot area	15,000 sq ft
Minimum lot width	40 ft
Density	2.0 du/ac
Maximum height	45 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	20 ft
- Minimum lot area is 15,000 sq ft for lots served by both public water and sewer; larger minimums apply where septic/well is used.	
- Minimum lot width applies only to lots containing a detached single-family dwelling (40 ft).	
- Maximum building height: 3 stories, not to exceed 45 ft.	
- Source (adopted standards): Gaston County Unified Development Ordinance, Ch. 8 (Dimensional Standards) — https://cms3.revize.com/revize/gastoncounty/Documents/planning/UDO2018/0201Ch8_Suppl1017.pdf	

Standard	Value
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Gaston County 2035 Comprehensive Land Use Plan — future land use designations: Rural (49%), Rural Community (5%), Suburban Development (6%), Incorporated Areas & ETJ (38%). Verify the parcel's specific designation on the adopted FLU map.
- *Source:* <https://cms3.revize.com/revize/gastoncounty/Documents/planning/gaston-county-2035-comprehensive-land-use-plan.pdf>
- The parcel's specific designation on the adopted FLU map determines whether the current R-1 district is consistent with the county's long-range plan. A Rural / Rural Community designation supports the existing low-density single-family district and signals no near-term upzoning pressure; a Suburban or ETJ designation would provide a policy basis for higher-density residential entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** R-1 (R-1 Single Family Limited) at 2.0 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	315.60 acres
Minimum lot size	15,000 sq ft
Gross (theoretical) lots	916
Infrastructure efficiency	75%
Net buildable lots	687
- Process: Gaston County Building & Development Services — subdivision/plat review \$300 (minor, major, exempt, non-exempt; includes initial + one re-review); final plat review/approval \$300; plat re-review \$100.	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale. <i>Source:</i> https://www.gastongov.com/DocumentCenter/View/7877/FY26-Building-and-Development-Services-Fee-Schedule-PDF	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 40 ft; setbacks front 20 / side 5 / rear 20 ft), the NC Building Code, and Gaston County building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE** — max slope 5.0% (<15%), outside the floodplain, with road frontage. A single-family residence can be constructed subject only to standard permits and any site-specific utility/drainage conditions.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **5.0%** · Center elevation: **223.8 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- Source: *USFWS National Wetlands Inventory* (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities (county)	\$1,958–\$2,706 (3/4" residential)
Sewer tap	Two Rivers Utilities (county)	\$1,867–\$2,577 (4" residential)
Building permit	Gaston County	\$990 (county building permit minimum, new SFR)
Taps + permit subtotal	—	\$4,815–\$6,273
- Source: <i>Two Rivers Utilities (county) fee schedule</i> (https://www.cityofgastonia.com/government/departments/public-works/two-rivers-utilities)		
- Well / septic alternative (if no public service at the address): budget a private well (~\$6,000–\$12,000 drilled + pump) and a conventional septic system (~\$5,000–\$15,000 installed incl. perc test) — confirm local costs before relying on these ranges.		
- ⚠ Availability ≠ a tap: confirm an active water/sewer main with capacity exists at the address before budgeting the tap fees above.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Gaston County Schools — 58 schools, ~30,400 students; ranked #181–186 of ~320 NC districts (bottom 50%); 34 of 54 schools earned an A/B/C grade.
- Source: <https://www.publicschoolreview.com/north-carolina/gaston-county-schools-school-district/3701620-school-district>
- Commute to Charlotte metro employment is roughly 25–35 minutes via I-85/US-321; Gastonia submarket jobs are closer.

16. Market Analysis

Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	0	—	—	—

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
5 mi	5	\$384,438	\$203	\$30,755–\$57,666
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 48 closed sales.				

17. Market Saturation & Absorption by Product Type

Product type	Absorption	Days on market	Months of supply
Single-family detached	Strong (seller's-to-balanced)	~26–44	~3.5
Townhome / attached	Moderate	~30–45	~3.5–4
Condo	Soft	~40–60	~4.5–5
Multifamily / rental	Rental-demand driven	n/a	n/a
- Gaston County (mid-2026): median ~26 days on market, ~3.5 months of supply, ~334 homes sold/mo, avg sale ~\$401k — a balanced-to-seller's market.			
- Sources: https://ruizreport.com/@zac/gaston-nc/ (Ruiz Report); Redfin Gaston County (Jan 2026, median ~\$314K, 94-day DOM); Houzeo (4.8-mo supply).			
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; avoid condo product here.			

18. Interest Rate & Financing Environment

- Current 30-yr fixed: **6.5%–6.7% (30-yr fixed, 2026-08-14; Bankrate/WSJ)**. Trend: **steady-to-slightly-lower** this week. Source: <https://www.bankrate.com/mortgages/30-year-mortgage-rates/>.
- Effect on demand: a ~6.5% rate supports affordability for the median ~\$314K Gaston home (P&I ≈ \$1,585/mo before taxes/insurance); each 0.25% move changes that payment by roughly \$50/mo, directly pacing absorption and a builder's sell-through.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria: verified CLOSED sales within the search radius, matched to the parcel's permitted residential forms (Single-Family), nearest first (driving distance via Google Distance Matrix). All **48** sold comps:

#	Address	Type	Built	SqFt	Sold Date	Sold Price	\$/SqFt	Driving Mi	Straight-Line Mi	Type Evidence	Zoning Match	Verified

Bottom Line: 48 verified new-construction closings averaging **\$409,516** (avg **\$168/sqft**), ranging \$279,990–\$547,899. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- New-construction hard cost (Charlotte metro): **\$165–\$220/sq ft (Charlotte metro production–mid-range, 2026)**. Source: <https://www.costtobuildhouse.com/cost-per-square-foot-to-build-a-house-in-north-carolina>.
- Itemized hard-cost baseline below (the app's Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home ≈ \$250,000 ≈ \$156/sq ft); localize each line to current Charlotte-area prices and scale to the planned home size / the comps' typical sq ft.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900

Line item	Baseline (1,600 sq ft)
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Scaled to the comps' median 2,361 sq ft at \$185/sq ft, hard cost ≈ \$436,785 ; add soft/selling/financing (~25% of hard) and site-specific adders (clearing, slope grading, well/septic if applicable) — each adder reduces the land's value to a builder.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (R-1), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Method	Value
Land band per finished lot (8–15% of avg comp)	\$30,755–\$57,666
Whole-parcel value (band × 687 lots)	\$21,128,685–\$39,616,542
Implied per-acre (single-lot basis)	\$97–\$183
Builder residual land value @ 20% profit	\$-238,431/lot
- Reconciliation: the 8–15% land band and the residual-land-value pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes the tract is developed to its net lot yield, so a bulk sale should discount for infrastructure and absorption time. Reflect any supportable rezoning/subdivision upside on top.	

23. Builder/Developer Profitability Analysis

Residual land value pro forma — ARV \$384,438 (median comp), 2,361 sq ft home @ \$185/sq ft, 687 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$384,438	\$436,785	\$109,196	\$57,666	\$-219,209
20%	\$384,438	\$436,785	\$109,196	\$76,888	\$-238,431
25%	\$384,438	\$436,785	\$109,196	\$96,110	\$-257,653
- At 20% profit, residual land = \$-238,431/lot ≈ -62.0% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
Comps reflect a balanced market (~26–44 day DOM)	Low	Stress-test ARV at the 7% rate scenario.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Excellent**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~687 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 48-comp market, and subdivision lot yield.

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning).

Land Feasibility Report — 1201 LOWELL SPENCER MOUNTAIN RD (Gastonia, NC)

Feasibility Rating: **Excellent** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **215.18-acre vacant parcel** at 1201 LOWELL SPENCER MOUNTAIN RD, Gastonia, NC (Parcel ID **314219**, PIN 3576-19-3012), zoned **SFR-4CZ — Single-Family Residential (SFR-4)** under Lowell. Recorded owner: **DRP BOOKBINDER MULTISTATE LLC**.

Buildability verdict: the parcel is **buildable** — outside the FEMA special flood hazard area, with road frontage and a max slope of **9.9%** (center elevation 201.8 m). Zoning permits **Single-Family, Duplex** residential use at a minimum lot of **8,725 sq ft** and a density of 4.0 du/ac.

Subdivision potential: at the current district standards the tract yields **805 buildable lots** (gross 1,074 before 75% infrastructure efficiency).

Market anchor: 39 verified sold new-construction comps average **\$415,000**; the 8–15% land-value band is **\$33,200–\$62,250 per finished lot** (\$26,726,000–\$50,111,250 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-129,344/lot** (-31.2% of ARV) — cross-checked in Section 23.

Overall rating: **Excellent — Pursue**.

2. Property Overview

Field	Value
Address	1201 LOWELL SPENCER MOUNTAIN RD, Gastonia, NC 28056
Parcel ID / PIN	314219 / 3576-19-3012
Acres	215.18
Assessed land value	\$820,260
Total parcel value	\$820,260
Property class (code)	1001
Owner	DRP BOOKBINDER MULTISTATE LLC
Jurisdiction	Lowell

3. Parcel Verification

Field	Value
Parcel ID	314219
PIN	3576-19-3012
Owner of record	DRP BOOKBINDER MULTISTATE LLC
Mailing address	520 MADISON AVENUE, NEW YORK, NC 10022
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District: SFR-4CZ** — Single-Family Residential (SFR-4) (*conditional zoning — CZ; a site-specific condition applies*)
- **Jurisdiction:** Lowell · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** detached house, duplex, accessory uses
- **Allowed building types:** Single-Family, Duplex

Dimensional standards (adopted):

Standard	Value
Minimum lot area	8,725 sq ft
Minimum lot width	50 ft
Density	4.0 du/ac
Maximum height	42 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	4 ft
- Minimum lot width is measured at the front street setback (50 ft for SFR-4).	
- Corner-lot side-street setback: 10 ft.	
- Maximum building height: 42 ft (pitched-roof exception per Article 9).	
- <i>Source (adopted standards): City of Lowell Development Ordinance, Articles 8 & 9 — https://storage.googleapis.com/proudcity/lowellnc/2022/08/a6bd363e-lowell-article-8-districts-updated.pdf</i>	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Gaston County 2035 Comprehensive Land Use Plan — future land use designations: Rural (49%), Rural Community (5%), Suburban Development (6%), Incorporated Areas & ETJ (38%). Verify the parcel's specific designation on the adopted FLU map.
- *Source: <https://cms3.revize.com/revize/gastoncounty/Documents/planning/gaston-county-2035-comprehensive-land-use-plan.pdf>*
- The parcel's specific designation on the adopted FLU map determines whether the current SFR-4CZ district is consistent with the county's long-range plan. A Rural / Rural Community designation supports the existing low-density single-family district and signals no near-term upzoning pressure; a Suburban or ETJ designation would provide a policy basis for higher-density residential entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** SFR-4CZ (Single-Family Residential (SFR-4)) at 4.0 du/ac density, permitting Single-Family, Duplex.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU

map and utility capacity are confirmed.

- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezoned cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	215.18 acres
Minimum lot size	8,725 sq ft
Gross (theoretical) lots	1,074
Infrastructure efficiency	75%
Net buildable lots	805
- Process: Gaston County Building & Development Services — subdivision/plat review \$300 (minor, major, exempt, non-exempt; includes initial + one re-review); final plat review/approval \$300; plat re-review \$100.	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale. <i>Source: https://www.gastongov.com/DocumentCenter/View/7877/FY26-Building-and-Development-Services-Fee-Schedule-PDF</i>	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 50 ft; setbacks front 20 / side 5 / rear 4 ft), the NC Building Code, and Lowell building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE** — max slope 9.9% (<15%), outside the floodplain, with road frontage. A single-family residence can be constructed subject only to standard permits and any site-specific utility/drainage conditions.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **9.9%** · Center elevation: **201.8 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	City of Lowell	\$1,000–\$1,375 (3/4" residential)
Sewer tap	City of Lowell	\$1,250–\$1,680 (4" residential)
Building permit	Lowell	\$990 (county building permit minimum (assumed))
Taps + permit subtotal	—	\$3,240–\$4,045
- Source: City of Lowell fee schedule (https://www.lowellnc.com/)		
- Well / septic alternative (if no public service at the address): budget a private well (~\$6,000–\$12,000 drilled + pump) and a conventional septic system (~\$5,000–\$15,000 installed incl. perc test) — confirm local costs before relying on these ranges.		
- ⚠ Availability ≠ a tap: confirm an active water/sewer main with capacity exists at the address before budgeting the tap fees above.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Gaston County Schools — 58 schools, ~30,400 students; ranked #181–186 of ~320 NC districts (bottom 50%); 34 of 54 schools earned an A/B/C grade.
- Source: <https://www.publicschoolreview.com/north-carolina/gaston-county-schools-school-district/3701620-school-district>
- Commute to Charlotte metro employment is roughly 25–35 minutes via I-85/US-321; Gastonia submarket jobs are closer.

16. Market Analysis

Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	0	—	—	—
5 mi	1	\$415,000	\$207	\$33,200–\$62,250
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 39 closed sales.				

17. Market Saturation & Absorption by Product Type

Product type	Absorption	Days on market	Months of supply
Single-family detached	Strong (seller's-to-balanced)	~26–44	~3.5
Townhome / attached	Moderate	~30–45	~3.5–4
Condo	Soft	~40–60	~4.5–5
Multifamily / rental	Rental-demand driven	n/a	n/a
- Gaston County (mid-2026): median ~26 days on market, ~3.5 months of supply, ~334 homes sold/mo, avg sale ~\$401k — a balanced-to-seller's market.			
- Sources: https://ruizreport.com/@zac/gaston-nc/ (Ruiz Report); Redfin Gaston County (Jan 2026, median ~\$314K, 94-day DOM); Houzeo (4.8-mo supply).			
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; avoid condo product here.			

18. Interest Rate & Financing Environment

- Current 30-yr fixed: **6.5%–6.7% (30-yr fixed, 2026-08-14; Bankrate/WSJ)**. Trend: **steady-to-slightly-lower** this week. Source: <https://www.bankrate.com/mortgages/30-year-mortgage-rates/>.
- Effect on demand: a ~6.5% rate supports affordability for the median ~\$314K Gaston home (P&I ≈ \$1,585/mo before taxes/insurance); each 0.25% move changes that payment by roughly \$50/mo, directly pacing absorption and a builder's sell-through.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria: verified CLOSED sales within the search radius, matched to the parcel's permitted residential forms (Single-Family, Duplex), nearest first (driving distance via Google Distance Matrix). All **39** sold comps:

Bottom Line: 39 verified new-construction closings averaging **\$335,717** (avg **\$169/sqft**), ranging \$245,000–\$515,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- New-construction hard cost (Charlotte metro): **\$165–\$220/sq ft (Charlotte metro production–mid-range, 2026)**. Source: <https://www.costtobuildhouse.com/cost-per-square-foot-to-build-a-house-in-north-carolina>.
- Itemized hard-cost baseline below (the app's Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home ≈ \$250,000 ≈ \$156/sq ft); localize each line to current Charlotte-area prices and scale to the planned home size / the comps' typical sq ft.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600

Line item	Baseline (1,600 sq ft)
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Scaled to the comps' median 1,995 sq ft at \$185/sq ft, hard cost ≈ \$369,075 ; add soft/selling/financing (~25% of hard) and site-specific adders (clearing, slope grading, well/septic if applicable) — each adder reduces the land's value to a builder.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (SFR-4CZ), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Method	Value
Land band per finished lot (8–15% of avg comp)	\$33,200–\$62,250
Whole-parcel value (band × 805 lots)	\$26,726,000–\$50,111,250
Implied per-acre (single-lot basis)	\$154–\$289
Builder residual land value @ 20% profit	\$-129,344/lot
- Reconciliation: the 8–15% land band and the residual-land-value pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes the tract is developed to its net lot yield, so a bulk sale should discount for infrastructure and absorption time. Reflect any supportable rezoning/subdivision upside on top.	

23. Builder/Developer Profitability Analysis

Residual land value pro forma — ARV \$415,000 (median comp), 1,995 sq ft home @ \$185/sq ft, 805 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$415,000	\$369,075	\$92,269	\$62,250	\$-108,594
20%	\$415,000	\$369,075	\$92,269	\$83,000	\$-129,344
25%	\$415,000	\$369,075	\$92,269	\$103,750	\$-150,094
- At 20% profit, residual land = \$-129,344/lot ≈ -31.2% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).

Risk	Severity	Mitigation
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
Comps reflect a balanced market (~26–44 day DOM)	Low	Stress-test ARV at the 7% rate scenario.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Excellent**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~805 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 39-comp market, and subdivision lot yield.

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning).

Land Feasibility Report — 539 QUEENSBERRY DR (Gastonia, NC)

Feasibility Rating: **Excellent** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **1.00-acre vacant parcel** at 539 QUEENSBERRY DR, Gastonia, NC (Parcel ID **146027**, PIN 3533-00-1105), zoned **R-1 — R-1 Single Family Limited** under Gaston County. Recorded owner: **RHOM CLARENCE R**.

Buildability verdict: the parcel is **buildable** — outside the FEMA special flood hazard area, with road frontage and a max slope of **8.4%** (center elevation 221.1 m). Zoning permits **Single-Family** residential use at a minimum lot of **15,000 sq ft** and a density of 2.0 du/ac.

Subdivision potential: at the current district standards the tract yields **2 buildable lots** (gross 2 before 90% infrastructure efficiency).

Market anchor: 39 verified sold new-construction comps average **\$381,225**; the 8–15% land-value band is **\$30,498–\$57,184 per finished lot** (\$60,996–\$114,368 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-156,364/lot** (-41.0% of ARV) — cross-checked in Section 23.

Overall rating: **Excellent — Pursue**.

2. Property Overview

Field	Value
Address	539 QUEENSBERRY DR, Gastonia, NC 28052
Parcel ID / PIN	146027 / 3533-00-1105
Acres	1.00
Assessed land value	\$7,850
Total parcel value	\$510
Property class (code)	1000
Owner	RHOM CLARENCE R
Jurisdiction	Gaston County

3. Parcel Verification

Field	Value
Parcel ID	146027
PIN	3533-00-1105
Owner of record	RHOM CLARENCE R
Mailing address	5460 LEWIS RD, GASTONIA, NC 28052-9238

Field	Value
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District: R-1** — R-1 Single Family Limited
- **Jurisdiction:** Gaston County · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached, modular home, accessory uses
- **Allowed building types:** Single-Family

Dimensional standards (adopted):

Standard	Value
Minimum lot area	15,000 sq ft
Minimum lot width	40 ft
Density	2.0 du/ac
Maximum height	45 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	20 ft
- Minimum lot area is 15,000 sq ft for lots served by both public water and sewer; larger minimums apply where septic/well is used.	
- Minimum lot width applies only to lots containing a detached single-family dwelling (40 ft).	
- Maximum building height: 3 stories, not to exceed 45 ft.	
- <i>Source (adopted standards): Gaston County Unified Development Ordinance, Ch. 8 (Dimensional Standards) — https://cms3.revize.com/revize/gastoncounty/Documents/planning/UDO2018/0201Ch8_Suppl1017.pdf</i>	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Gaston County 2035 Comprehensive Land Use Plan — future land use designations: Rural (49%), Rural Community (5%), Suburban Development (6%), Incorporated Areas & ETJ (38%). Verify the parcel's specific designation on the adopted FLU map.
- *Source: <https://cms3.revize.com/revize/gastoncounty/Documents/planning/gaston-county-2035-comprehensive-land-use-plan.pdf>*
- The parcel's specific designation on the adopted FLU map determines whether the current R-1 district is consistent with the county's long-range plan. A Rural / Rural Community designation supports the existing low-density single-family district and signals no near-term upzoning pressure; a Suburban or ETJ designation would provide a policy basis for higher-density residential entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** R-1 (R-1 Single Family Limited) at 2.0 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	1.00 acres
Minimum lot size	15,000 sq ft
Gross (theoretical) lots	2
Infrastructure efficiency	90%
Net buildable lots	2
- Process: Gaston County Building & Development Services — subdivision/plat review \$300 (minor, major, exempt, non-exempt; includes initial + one re-review); final plat review/approval \$300; plat re-review \$100.	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale. Source: https://www.gastongov.com/DocumentCenter/View/7877/FY26-Building-and-Development-Services-Fee-Schedule-PDF	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 40 ft; setbacks front 20 / side 5 / rear 20 ft), the NC Building Code, and Gaston County building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE** — max slope 8.4% (<15%), outside the floodplain, with road frontage. A single-family residence can be constructed subject only to standard permits and any site-specific utility/drainage conditions.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **8.4%** · Center elevation: **221.1 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- Source: *USFWS National Wetlands Inventory* (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities (county)	\$1,958–\$2,706 (3/4" residential)

Service	Provider / scenario	Est. cost
Sewer tap	Two Rivers Utilities (county)	\$1,867–\$2,577 (4" residential)
Building permit	Gaston County	\$990 (county building permit minimum, new SFR)
Taps + permit subtotal	—	\$4,815–\$6,273
- Source: <i>Two Rivers Utilities (county) fee schedule</i> (https://www.cityofgastonia.com/government/departments/public-works/two-rivers-utilities)		
- Well / septic alternative (if no public service at the address): budget a private well (~\$6,000–\$12,000 drilled + pump) and a conventional septic system (~\$5,000–\$15,000 installed incl. perc test) — confirm local costs before relying on these ranges.		
- Δ Availability ≠ a tap: confirm an active water/sewer main with capacity exists at the address before budgeting the tap fees above.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Gaston County Schools — 58 schools, ~30,400 students; ranked #181–186 of ~320 NC districts (bottom 50%); 34 of 54 schools earned an A/B/C grade.
- Source: <https://www.publicschoolreview.com/north-carolina/gaston-county-schools-school-district/3701620-school-district>
- Commute to Charlotte metro employment is roughly 25–35 minutes via I-85/US-321; Gastonia submarket jobs are closer.

16. Market Analysis

Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	0	—	—	—
5 mi	4	\$381,225	\$185	\$30,498–\$57,184
- Source: <i>RealtyAPI (Realtor/Redfin/Zillow sold records)</i> — 39 closed sales.				

17. Market Saturation & Absorption by Product Type

Product type	Absorption	Days on market	Months of supply
Single-family detached	Strong (seller's-to-balanced)	~26–44	~3.5
Townhome / attached	Moderate	~30–45	~3.5–4
Condo	Soft	~40–60	~4.5–5
Multifamily / rental	Rental-demand driven	n/a	n/a
- Gaston County (mid-2026): median ~26 days on market, ~3.5 months of supply, ~334 homes sold/mo, avg sale ~\$401k — a balanced-to-seller's market.			
- Sources: https://ruizreport.com/@zac/gaston-nc/ (Ruiz Report); <i>Redfin Gaston County (Jan 2026, median ~\$314K, 94-day DOM)</i> ; <i>Houzeo (4.8-mo supply)</i> .			
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; avoid condo product here.			

18. Interest Rate & Financing Environment

- Current 30-yr fixed: **6.5%–6.7% (30-yr fixed, 2026-08-14; Bankrate/WSJ)**. Trend: **steady-to-slightly-lower** this week. Source: <https://www.bankrate.com/mortgages/30-year-mortgage-rates/>.
- Effect on demand: a ~6.5% rate supports affordability for the median ~\$314K Gaston home (P&I ≈ \$1,585/mo before taxes/insurance); each 0.25% move changes that payment by roughly \$50/mo, directly pacing absorption and a builder's sell-through.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria: verified CLOSED sales within the search radius, matched to the parcel's permitted residential forms (Single-Family), nearest first (driving distance via Google Distance Matrix). All **39** sold comps:

37	727 Sun Briar Cir, Clover, SC, 29710	Single-Family	N/A	2,368	2022-06-03	\$375,240	\$158	7.51	4.78	single-family type published by the source	Single-Family is included by the parcel's source-backed zoning use profile.	RealtyAPI closed-sale record
38	723 Sun Briar Cir, Clover, SC, 29710	Single-Family	N/A	1,927	2022-06-10	\$362,165	\$188	7.52	4.77	single-family type published by the source	Single-Family is included by the parcel's source-backed zoning use profile.	RealtyAPI closed-sale record
39	1490 White Hall Pl, Gastonia, NC, 28056	Single-Family	N/A	1,848	2025-07-10	\$415,000	\$225	7.62	4.19	single-family type published by the source	Single-Family is included by the parcel's source-backed zoning use profile.	RealtyAPI closed-sale record

Bottom Line: 39 verified new-construction closings averaging **\$380,297** (avg **\$181/sqft**), ranging \$315,900–\$493,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- New-construction hard cost (Charlotte metro): **\$165–\$220/sq ft (Charlotte metro production–mid-range, 2026)**. Source: <https://www.costtobuildhouse.com/cost-per-square-foot-to-build-a-house-in-north-carolina>.
- Itemized hard-cost baseline below (the app's Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home ≈ \$250,000 ≈ \$156/sq ft); localize each line to current Charlotte-area prices and scale to the planned home size / the comps' typical sq ft.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600

Line item	Baseline (1,600 sq ft)
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Scaled to the comps' median 1,995 sq ft at \$185/sq ft, hard cost ≈ \$369,075 ; add soft/selling/financing (~25% of hard) and site-specific adders (clearing, slope grading, well/septic if applicable) — each adder reduces the land's value to a builder.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (R-1), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Method	Value
Land band per finished lot (8–15% of avg comp)	\$30,498–\$57,184
Whole-parcel value (band × 2 lots)	\$60,996–\$114,368
Implied per-acre (single-lot basis)	\$30,498–\$57,184
Builder residual land value @ 20% profit	\$-156,364/lot
- Reconciliation: the 8–15% land band and the residual-land-value pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes the tract is developed to its net lot yield, so a bulk sale should discount for infrastructure and absorption time. Reflect any supportable rezoning/subdivision upside on top.	

23. Builder/Developer Profitability Analysis

Residual land value pro forma — ARV \$381,225 (median comp), 1,995 sq ft home @ \$185/sq ft, 2 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$381,225	\$369,075	\$92,269	\$57,184	\$-137,302
20%	\$381,225	\$369,075	\$92,269	\$76,245	\$-156,364
25%	\$381,225	\$369,075	\$92,269	\$95,306	\$-175,425
- At 20% profit, residual land = \$-156,364/lot ≈ -41.0% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.

Risk	Severity	Mitigation
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
Comps reflect a balanced market (~26–44 day DOM)	Low	Stress-test ARV at the 7% rate scenario.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Excellent**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~2 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 39-comp market, and subdivision lot yield.

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning).

Land Feasibility Report — S INMAN AVE (Bessemer City, NC)

Feasibility Rating: **Good** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **1.00-acre vacant parcel** at S INMAN AVE, Bessemer City, NC (Parcel ID **120981**, PIN 3516-66-0296), zoned **NR — Neighborhood Residential (NR)** under Bessemer City. Recorded owner: **CALDWELL CHAD EVERETTE**.

Buildability verdict: the parcel is **moderate** — outside the FEMA special flood hazard area, with road frontage and a max slope of **18.0%** (center elevation 286.9 m). Zoning permits **Single-Family, Duplex** residential use at a minimum lot of **5,000 sq ft**.

Subdivision potential: at the current district standards the tract yields **6 buildable lots** (gross 8 before 75% infrastructure efficiency).

Market anchor: 10 verified sold new-construction comps average **\$308,956**; the 8–15% land-value band is **\$24,716–\$46,343 per finished lot** (\$148,296–\$278,058 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-105,376/lot** (-34.1% of ARV) — cross-checked in Section 23.

Overall rating: **Good — Pursue**.

2. Property Overview

Field	Value
Address	S INMAN AVE, Bessemer City, NC 28016
Parcel ID / PIN	120981 / 3516-66-0296
Acres	1.00
Assessed land value	\$3,980
Total parcel value	\$4,590
Property class (code)	1090
Owner	CALDWELL CHAD EVERETTE
Jurisdiction	Bessemer City

3. Parcel Verification

Field	Value
Parcel ID	120981
PIN	3516-66-0296
Owner of record	CALDWELL CHAD EVERETTE
Mailing address	120 S INMAN AVE, BESSEMER CITY, NC 28016

Field	Value
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District:** NR — Neighborhood Residential (NR)
- **Jurisdiction:** Bessemer City · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached, duplex
- **Allowed building types:** Single-Family, Duplex

Dimensional standards (adopted):

Standard	Value
Minimum lot area	5,000 sq ft
Minimum lot width	Unknown — confirm with ordinance
Density	Unknown
Maximum height	Unknown
Setbacks	Unknown — confirm with the district dimensional table
- Source (adopted standards): Bessemer City Land Development Code — https://library.municode.com/nc/bessemer_city/codes/land_development_code	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Gaston County 2035 Comprehensive Land Use Plan — future land use designations: Rural (49%), Rural Community (5%), Suburban Development (6%), Incorporated Areas & ETJ (38%). Verify the parcel's specific designation on the adopted FLU map.
- Source: <https://cms3.revize.com/revize/gastoncounty/Documents/planning/gaston-county-2035-comprehensive-land-use-plan.pdf>
- The parcel's specific designation on the adopted FLU map determines whether the current NR district is consistent with the county's long-range plan. A Rural / Rural Community designation supports the existing low-density single-family district and signals no near-term upzoning pressure; a Suburban or ETJ designation would provide a policy basis for higher-density residential entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** NR (Neighborhood Residential (NR)) at unknown density, permitting Single-Family, Duplex.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	1.00 acres
Minimum lot size	5,000 sq ft
Gross (theoretical) lots	8

Metric	Value
Infrastructure efficiency	75%
Net buildable lots	6
- Process: Gaston County Building & Development Services — subdivision/plat review \$300 (minor, major, exempt, non-exempt; includes initial + one re-review); final plat review/approval \$300; plat re-review \$100.	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale. <i>Source: https://www.gastongov.com/DocumentCenter/View/7877/FY26-Building-and-Development-Services-Fee-Schedule-PDF</i>	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width — ft; setbacks front ? / side ? / rear ? ft), the NC Building Code, and Bessemer City building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE WITH ENGINEERING** — max slope 18.0% (15–25%) adds grading/retaining/earthwork cost; otherwise clean.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **18.0%** · Center elevation: **286.9 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Bessemer City / Bessemer Utilities	\$1,977–\$1,977 (3/4" residential)
Sewer tap	Bessemer City / Bessemer Utilities	\$500–\$700 (4" residential)
Building permit	Bessemer City	\$990 (county building permit minimum (assumed))
Taps + permit subtotal	—	\$3,467–\$3,667
- Source: Bessemer City / Bessemer Utilities fee schedule (https://www.bessemercity.com/)		
- Well / septic alternative (if no public service at the address): budget a private well (~\$6,000–\$12,000 drilled + pump) and a conventional septic system (~\$5,000–\$15,000 installed incl. perc test) — confirm local costs before relying on these ranges.		

Service	Provider / scenario	Est. cost
- Δ Availability $\neq$ a tap: confirm an active water/sewer main with capacity exists at the address before budgeting the tap fees above.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Gaston County Schools — 58 schools, ~30,400 students; ranked #181–186 of ~320 NC districts (bottom 50%); 34 of 54 schools earned an A/B/C grade.
- Source: <https://www.publicschoolreview.com/north-carolina/gaston-county-schools-school-district/3701620-school-district>
- Commute to Charlotte metro employment is roughly 25–35 minutes via I-85/US-321; Gastonia submarket jobs are closer.

16. Market Analysis

Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	0	—	—	—
5 mi	4	\$308,956	\$164	\$24,716–\$46,343
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 10 closed sales.				

17. Market Saturation & Absorption by Product Type

Product type	Absorption	Days on market	Months of supply
Single-family detached	Strong (seller's-to-balanced)	~26–44	~3.5
Townhome / attached	Moderate	~30–45	~3.5–4
Condo	Soft	~40–60	~4.5–5
Multifamily / rental	Rental-demand driven	n/a	n/a
- Gaston County (mid-2026): median ~26 days on market, ~3.5 months of supply, ~334 homes sold/mo, avg sale ~\$401k — a balanced-to-seller's market.			
- Sources: https://ruizreport.com/@zac/gaston-nc/ (Ruiz Report); Redfin Gaston County (Jan 2026, median ~\$314K, 94-day DOM); Houzeo (4.8-mo supply).			
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; avoid condo product here.			

18. Interest Rate & Financing Environment

- Current 30-yr fixed: **6.5%–6.7% (30-yr fixed, 2026-08-14; Bankrate/WSJ)**. Trend: **steady-to-slightly-lower** this week. Source: <https://www.bankrate.com/mortgages/30-year-mortgage-rates/>.
- Effect on demand: a ~6.5% rate supports affordability for the median ~\$314K Gaston home (P&I $\approx$ \$1,585/mo before taxes/insurance); each 0.25% move changes that payment by roughly \$50/mo, directly pacing absorption and a builder's sell-through.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria: verified CLOSED sales within the search radius, matched to the parcel's permitted residential forms (Single-Family, Duplex), nearest first (driving distance via Google Distance Matrix). All **10** sold comps:

#	Address	Type	Built	SqFt	Sold Date	Sold Price	\$/SqFt	Driving Mi	Straight-Line Mi	Type Evidence	Zoning Match	Verified
1	1505 Iron Forge Ct, Bessemer City, NC, 28016	Single-Family	N/A	2,386	2026-01-09	\$335,000	\$140	3.05	2.20	single-family type published by the source	Single-Family is included by the parcel's source-backed zoning use profile.	RealtyAPI closed-sale record

10	3354 Burberry Dr, Gastonia, NC, 28052	Single-Family	N/A	1,552	2025-07-11	\$315,900	\$204	8.44	5.96	single-family type published by the source	Single-Family is included by the parcel's source-backed zoning use profile.	RealtyAPI closed-sale record

Bottom Line: 10 verified new-construction closings averaging **\$322,216** (avg **\$182/sqft**), ranging \$225,000–\$441,925. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- New-construction hard cost (Charlotte metro): **\$165–\$220/sq ft (Charlotte metro production–mid-range, 2026)**. Source: <https://www.costtobuildhouse.com/cost-per-square-foot-to-build-a-house-in-north-carolina>.
- Itemized hard-cost baseline below (the app's Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home ≈ \$250,000 ≈ \$156/sq ft); localize each line to current Charlotte-area prices and scale to the planned home size / the comps' typical sq ft.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Scaled to the comps' median 1,524 sq ft at \$185/sq ft, hard cost ≈ \$281,940 ; add soft/selling/financing (~25% of hard) and site-specific adders (clearing, slope grading, well/septic if applicable) — each adder reduces the land's value to a builder.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (NR), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Method	Value
Land band per finished lot (8–15% of avg comp)	\$24,716– \$46,343

Method	Value
Whole-parcel value (band × 6 lots)	\$148,296– \$278,058
Implied per-acre (single-lot basis)	\$24,716– \$46,343
Builder residual land value @ 20% profit	\$-105,376/lot
- Reconciliation: the 8–15% land band and the residual-land-value pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes the tract is developed to its net lot yield, so a bulk sale should discount for infrastructure and absorption time. Reflect any supportable rezoning/subdivision upside on top.	

23. Builder/Developer Profitability Analysis

Residual land value pro forma — ARV \$308,956 (median comp), 1,524 sq ft home @ \$185/sq ft, 6 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$308,956	\$282,032	\$70,508	\$46,343	\$-89,928
20%	\$308,956	\$282,032	\$70,508	\$61,791	\$-105,376
25%	\$308,956	\$282,032	\$70,508	\$77,239	\$-120,824
- At 20% profit, residual land = \$-105,376/lot ≈ -34.1% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Slope (18.0%) adds grading/earthwork cost	Medium	Budget site-work adders; obtain a topographic survey before offer.
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
Comps reflect a balanced market (~26–44 day DOM)	Low	Stress-test ARV at the 7% rate scenario.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Good**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy:** Single-family residential development (subdivide to ~6 lots).
- **Primary risks:** the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers:** buildable slope, no floodplain, road frontage, verified 10-comp market, and subdivision lot yield.
