AI Land Feasibility Report

4012 Beechwood Spring Ln, Belmont, NC 28012

Verdict: Feasible for a custom single-family home, subject to price discipline. 0.67 acres (PID 203831, PIN 3591-68-5246) in the gated **Reflection Pointe** community on the Lake Wylie side of Belmont. Zoning **G-R General Residential** permits single-family, duplex and townhouse by right; recorded subdivision covenants narrow that in practice to **custom single-family homes of at least 2,000 sq ft (1-story) or 2,400 sq ft (2-story)** with architectural review, and expressly disallow manufactured and modular homes. Water and public sewer are reported available, the parcel is in FEMA Zone X, and it has frontage on a paved private road. The two real constraints are **37 ft of grade across the lot (~14% slope)** and an asking price of **$109,000** against a $76,000 county value. **Land Feasibility Score 77/100.**

1. Executive & Development Summary

Item	Finding
Address	4012 Beechwood Spring Ln, Belmont, NC 28012
PID / PIN	203831 / 3591-68-5246
Subdivision	Reflection Pointe (Lot 62 (portal label 'Unit L 62'))
Lot size	0.67 acres / 29,185 sq ft (181 x 271 ft bounding box)
Zoning	G-R — General Residential (City of Belmont LDC §5.4)
Jurisdiction / ETJ	BELMONT city limits / ETJ: NO
Permitted housing types	Single-family detached, duplex, townhouse (new developments only)
Not permitted	Triplex, quadplex, multi-family/apartments, manufactured/mobile homes
Maximum density	6 units/acre → **4.02 units** theoretical ceiling on 0.67 ac
Road access	Beechwood Spring Ln — **PRIVATE (HOA-maintained)**, 20 ft from the boundary
Water / Sewer	City of Belmont water / Public sewer — reported available
Flood	Zone X (AREA OF MINIMAL FLOOD HAZARD); 21 of 21 interior sample points fall in Zone X (unshaded); 0 in SFHA
Terrain	36.6 ft relief, approx 14% slope
Asking price	$109,000 (MLS #4346398, Active, 255 days on market; cut from $119,000)
County assessed value	$76,000
Last recorded sale	$67,000 in 2022 (Deed 5353/0386)
Comp set used	303 routed built-product sales within 6.0 driving miles (from 2,834 pulled across Zillow, Redfin, Realtor.com and reconciled to county CAMA structure codes)
Land Feasibility Score	**77/100** — buildability **8/10**, development risk **Moderate**

What the analysis actually says

The parcel is a **finished-lot infill opportunity inside an existing luxury subdivision**, not a raw-land development play. Everything that usually kills a lot deal is already resolved: entitlement is by right, the street exists and is paved, water and sewer are in the ground, and the flood map is clean. What remains is scope control — the grade means a walk-out foundation, and the covenants mean the buyer must build a house that meets the community's architectural standards, which pushes construction cost toward the top of the local range.

At the covenant minimum of 2,400 sq ft and this community's $333 per sq ft, the finished house supports about $799,200 of value against $600,000 of construction plus the $109,000 lot — **a spec builder loses money at that size** (-$15,760). The community-typical 4,000 sq ft build is still negative for a spec builder (-$64,600) but turns positive for an **owner-builder** who keeps the builder margin ($113,000). That is who buys lots on this street today — 4000 Beechwood Spring at $69,500, 4029 Beechwood Spring at $135,000, 4208 Arbors Ford at $165,000 — and it is the basis of the offer range in Section 26.

2. Property & Parcel Overview

- **Legal description:** Reflection Pointe, Lot 62 (portal label 'Unit L 62'); county parcel 3591-68-5246 (PID 203831).
- **Geometry:** a 44-vertex polygon measuring approximately **181 x 271 ft** across its bounding box, computed area **29,185 sq ft (0.6700 ac)**, which matches the county's 0.67 acre record.
- **Current use:** Vacant (CAMA code 1000). No structure on the parcel — land value $76,000 equals total value $76,000.
- **Position in the subdivision:** an interior lot on the north side of Beechwood Spring Ln, roughly 0.02 mi from 4020 Beechwood Spring Ln and one lot removed from the Lake Pointe Dr entry spine. Adjoining parcels to the north and west are built single-family lots; the 37.94-acre homeowners-association parcel (PIN 3591-58-5447, LAKE POINTE DR) wraps the community common area nearby.
- **Surrounding lot pattern:** neighbouring lots run 0.55–1.14 acres, all single-family, all in the same gated community — a consistent, fully platted pattern with no assemblage upside and no rezoning path that would make sense economically.

3. Ownership, Deed & Title Context

- **Record owner:** GENNINO LISA (mailing address 19 BISHOP ROAD, OXFORD).
- **Last recorded sale:** $67,000 in 2022, Deed Book 5353, Page 0386 (Gaston County CAMA).

- **Assessment:** land $76,000, total $76,000 — the county carries the parcel at the vacant-land value, and the current $109,000 ask is roughly 1.43× that assessment.
- **Title items to confirm:** that the Reflection Pointe declaration and architectural-review covenant run with this lot; the deeded status of Beechwood Spring Ln (the HOA maintains it, so confirm the lot has an express access easement or frontage right, not merely an address); and whether the boat-slip/marina membership attaches to this lot or is separately deeded (it is separately deeded on 4017 Beechwood Spring).

4. Zoning Analysis

Base district: G-R — General Residential. Verified by point query against the Belmont Zoning layer: OBJECTID 12651, `NAME = GENERAL RESIDENTIAL`, `TYPE = G-R`, `JURISDICTION = BELMONT`, `ETJ = NO`. No overlay district intersects the parcel.

Permitted building types (LDC §5.4): Detached House – Alley and Street Lot; Townhouse; Civic Building.

Permitted residential uses (LDC §5.4(3), verbatim): *"Single Family Homes, Duplexes, and Townhouses (in new developments only, no townhouses are permitted on infill lots in the GR District)."*

Standard	G-R requirement	Subject parcel
Minimum lot size	4,000 sq ft (lots platted before 6/6/2002); duplex 10,000 sq ft	29,185 sq ft — passes both
Maximum density	6 units/acre	0.67 ac × 6 = 4.02 units
Building-type ratio	Detached-Alley + Townhouse ≤ 30% of units	n/a for a single lot
Lot width (infill)	average width of lots within 300 ft or 1 block	181 ft bounding width — well above any neighbourhood average
Height	2.5 stories (detached), 3 stories (townhouse)	flat/wooded lot, no height constraint

Dimensional standards applied through Chapter 4 building types:

- *Detached House, Street Lot:* minimum lot width **55 ft**; front setback **20 ft** (30 ft parking pad if the garage faces the street); side setback **20% of lot width**, or **12 ft** on infill lots of 10,000 sq ft or more and **8 ft** below that; rear **30 ft**; maximum impervious coverage **50%**; 2.5 stories.
- *Townhouse:* minimum lot width **16 ft**; front **0–25 ft**; sides **0 ft (6 ft on a corner)**; 3 stories.

Uses that are NOT permitted here. Triplex, quadplex, multi-family/apartment buildings and manufactured/mobile homes all return **Not a permitted use** in the valuation table below. The GR district has no apartment building type and no manufactured-housing use — Belmont routes manufactured housing to the separate MH-R district — so publishing a dollar range for those uses on this parcel would be fabrication. They are listed so the exclusion is explicit rather than implied.

Portal discrepancy, flagged: several MLS listings for lots on this street show *"Zoning: R-1"* or *"Residential"*. **R-1 is not a Belmont district code.** The authoritative district is G-R per the county zoning layer; treat any R-1 reference in marketing material as an artefact.

5. Future Land Use & Comprehensive Plan

- Belmont adopted a new Comprehensive Land Use Plan and is in an active **Land Development Code update**; listings in the South Point corridor openly market the "golden window" of that rewrite.
- The subject sits in the **South Point Peninsula / Lake Wylie** planning area, which the plan treats as established Suburban/Semi-Rural Neighborhood with village-center nodes concentrated on South Point Rd, not on Beechwood Spring Ln.
- Nothing in the plan points toward upzoning this interior subdivision lot: it is surrounded by built single-family homes and HOA common area, and the Lot 62 position gives no corner exposure. **Highest and best use remains one custom single-family home.**
- Verify the exact Future Land Use designation on the adopted plan map at the counter — it does not change the outcome, and no speculative rezoning value should be priced into an offer.

6. Subdivision & Community Governance — the decisive constraint

Item	Detail
Community	Reflection Pointe — gated, Lake Wylie access
HOA	Property Matters Realty LLC (704-861-0833)
HOA dues	$1,180-$1,302 semi-annually (varies by listing; subject listing shows $1,180/semi-annual, adjacent 4000 Beechwood listing shows $1,302/semi-annual)
Amenities	gated entry, clubhouse, outdoor pool, tennis/sport courts, walking trails, playground, boat/RV storage, community marina and boat slips, Lake Wylie access
Recorded restrictions	Architectural Review, Building, Deed, Manufactured Home Not Allowed, Modular Not Allowed, Signage, Subdivision (per MLS restrictions field for adjacent 4000 Beechwood Spring Ln, MLS 4422432)
Minimum home size	Minimum 2,000 sq ft heated living area (HLA) for a 1-story home; 2,400 sq ft HLA for a 2-story home
Builder rule	Community 'Featured Builders' list, or an outside qualified custom builder subject to architectural review
Build deadline	No build-time requirement reported in current listings
Road	Beechwood Spring Ln is a private road (county street layer OWNER = PVT, 2 lanes, 35 mph, no sidewalk, subdivision REFLECTION POINTE)

Why this matters more than the zoning table. Base zoning would technically allow a duplex or a townhome here. **The recorded covenants do not.** The restrictions field on the adjacent lot (4000 Beechwood Spring Ln, MLS 4422432) lists *Architectural Review, Building, Deed, Manufactured Home Not Allowed, Modular Not Allowed, Signage, Subdivision*, and multiple community listings state the 2,000/2,400 sq ft minimum heated-living-area rule. Practically, the parcel is a **single-family custom-home site**, and any duplex or townhome scenario is academic. This report still prices those uses in Section 19 because the base zoning permits them and the user requires every permitted type to be shown — but the build recommendation in Sections 18 and 22 is single-family only.

7. Lot Size, Dimensions & Site Characteristics

- **Area:** 29,185 sq ft (0.6700 ac) — on the large side for the street; neighbouring lots run 0.55–1.14 ac.
- **Width / depth:** roughly 181 ft × 271 ft across the bounding box; the lot is deeper than it is wide, which suits a side-load or front-load garage with a rear yard.
- **Coverage headroom:** at a 50% maximum impervious limit, the buildable envelope comfortably accommodates a 4,000–4,600 sq ft house plus drive and patio, matching the size of the homes that have sold for $1.19M–$1.37M on this street.
- **Vegetation:** wooded per the county aerial and the marketing for adjacent lots; tree-save and landscaping standards in Chapter 11 of the LDC apply at site-plan/permit stage.

8. Road Access & Frontage

- **Frontage road:** Beechwood Spring Ln — 2 lanes, 35 mph posted, no sidewalk, **owner recorded as PVT (private)** in the Gaston County street layer, subdivision = Reflection Pointe.
- **Distance:** the parcel boundary sits about **20 ft** from the road centreline, and 4012 falls inside the 4000–4038 address block, so frontage is **direct and paved** — no easement-by-necessity issue, unlike the Gastonia interior-lot case.
- **Access control:** the entire community is behind a gate; deliveries, trades and site access run through the HOA gate. Build scheduling must account for gate hours and staging rules.
- **Street maintenance:** because the road is private, the city does not plow, patch or accept it; the HOA does. Confirm the current reserve study — a special assessment for road resurfacing is the standard hidden cost in a private-road community.
- **Frontage to confirm on the plat:** the deeded frontage length is estimated at about **100 ft** from geometry; the recorded plat controls.

9. Public Water & Sewer

- **Water:** City of Belmont water - reported available (MLS utilities field for adjacent 4000 Beechwood Spring Ln: 'Water: City').
- **Sewer:** Public sewer - reported available (MLS: 'Sewer: Public Sewer'); Reflection Pointe is sewered, unlike many Gaston County subdivisions.
- This is a material advantage over most Gaston County land: the community is built out on municipal utilities, so there is **no well, no septic field, no perc test, and no health-department approval** in the critical path.
- Water and sewer availability is taken from the adjacent lot's MLS utilities field and the built-out condition of the subdivision. Before closing, obtain a City of Belmont utility availability/will-serve letter for PID 203831 (tap fees are not included in any figure in this report).
- **Tap/impact fees are not included** in any valuation or pro-forma figure in this report — obtain the city's current water and sewer tap quote before making an offer.

10. Well & Septic Considerations

Not applicable in the normal case, because public water and sewer are available. If a buyer ever wanted to build before sewer connection, a private well and septic system would need Gaston County Environmental Health approval on a 0.67-acre lot with 13% grade — the soils and slope make that a poor bet, and the county's minimum lot size for a septic system on this soil series is a real constraint. **Recommendation: connect to public utilities; do not plan around well/septic.**

11. Terrain, Elevation & Slope

Sample	Elevation (ft)
Centre	698.9
Northwest	703.4
Northeast	694.9
Southwest	666.8
Southeast	667.8

- **Relief:** 36.6 ft across a 181 x 271 ft footprint → approximately **14% average grade**, falling from the northwest corner toward the southwest.
- **Implication:** Falls roughly 36 ft from the northwest to the southwest corner over a 181 x 271 ft footprint - a walk-out / daylight-basement or crawl-space foundation is the natural fit, and retaining walls or a graded drive may be needed. Matches listing language for neighbouring Reflection Pointe lots ('gently sloping, wooded', 'walkout foundation').
- **Cost effect:** expect additional foundation, retaining-wall and driveway grading cost versus a flat lot — the single largest line-item risk in this deal. Get a grading plan and a geotech letter (Piedmont red clay is present throughout Gaston County) before finalising a construction budget.

12. Flood Zones, Wetlands & Environmental Constraints

- **FEMA NFHL:** Zone **X** — *AREA OF MINIMAL FLOOD HAZARD*, `SFHA_TF = F`, panel 37071C. 21 of 21 interior sample points fall in Zone X (unshaded); 0 in SFHA.
- **Floodway:** none. **Special flood hazard area: none.** No flood insurance requirement is triggered by the map.
- **Wetlands / streams:** no mapped stream or wetland crosses the parcel; the Lake Wylie shoreline is several lots away and the parcel has no water frontage (the community's lake access is via the marina/beach amenity, not the lot).
- **Stormwater:** the LDC requires post-construction stormwater management for new impervious area; on a 13% grade this typically means a graded swale and possibly a small infiltration area rather than a pond. Confirm the current Belmont/Catawba basin requirements at permit stage.

13. Easements & Site Constraints

- **Visible constraints:** none mapped across the parcel in the county layers.
- **Likely encumbrances to abstract:** utility easements along the Beechwood Spring Ln frontage (typical 10–20 ft), any drainage easement serving uphill lots to the north and east, and the HOA's architectural-review covenant.
- **Setback reality check:** with a 20 ft front, 30 ft rear and roughly 8–12 ft sides under the infill rule, the envelope is approximately **221 ft deep × 109 ft wide (24,001 sq ft)** — ample for a 4,000+ sq ft house, but the grade will dictate where the footprint can sit economically.

14. Nearby Infrastructure & Surrounding Development

- **Utilities and services:** city water, public sewer, Duke Energy/Piedmont Natural Gas service area, Gaston County Schools busing, Belmont PD/fire coverage.
- **Retail and services:** downtown Belmont (restaurants, Harris Teeter, schools, parks) is roughly a 10-minute drive; Charlotte Douglas International is reachable via I-85/South Point Rd.
- **Recreation:** the community itself carries the amenity load — gated entry, clubhouse, outdoor pool, tennis/sport courts, walking trails, playground, boat/RV storage, community marina and boat slips, Lake Wylie access.
- **Surrounding development pattern:** built-out single-family on all four sides, with the 37.94-acre Lake Pointe Dr HOA parcel providing common open space.

15. Nearby New Construction & Development Activity

- **Within the community:** active custom-home build-out. Recent closings on this street alone: **4017 Beechwood Spring Ln — $1,365,000 on 2026-06-25** (4,646 sq ft, 1.14 ac); **4009 Beechwood Spring Ln — $1,190,000 (2025)**; **4004 Beechwood Spring Ln — $1,200,000 (2024)**.
- **In the comp set:** 76 of the 231 single-family comps within 6 driving miles were built in 2023 or later — a market that is still producing new product.
- **Larger pipeline:** Gaston County's development-tracking layer lists **Lakeview Farms — PROPOSED, 479 single-family units plus 52 multi-family units on 221.76 acres** in Belmont, within approximately 1.2 miles of the subject. That is meaningful new supply entering the same school and retail catchment.
- **Land absorption on this street:** six vacant lots have traded on Beechwood Spring Ln / Arbors Ford Ct since 2023 at $43,000–$165,000, which tells you the community is still absorbing finished lots at a steady pace.

16. Market Context — comps by permitted housing type

The comp engine pulled sold records from **Zillow, Redfin and Realtor.com** within 6 radial miles, then reconciled each address to the **Gaston County CAMA structure code** so portal marketing labels could not mislabel a duplex as a single-family home (5 type corrections were applied in this run, e.g. 606 North St and 405 Gaston Ave reclassified from multi-family to duplex on CAMA code 1020), and **collapsed 13 duplicate property records** that the portals reported twice under conflicting type labels. Where the county record disagreed with the portal, the county won. Driving distance to each comp street was then routed in Google Maps. Of 2,834 pulled records, **303 carry a verified driving distance inside 6.0 miles**; 2,190 routed beyond 6.0 miles and 328 could not be routed and were excluded rather than guessed.

Housing type	Permitted in G-R?	0-1 mi	0-3 mi	0-6 mi
Single-Family	Yes	7	35	231
Duplex	Yes	0	0	2
Townhouse	Yes (new dev. only)	0	1	67
Triplex	**No**	0	0	0
Quadplex	**No**	0	0	0
Multi-Family	**No**	0	0	1
Mobile/Modular	**No**	0	0	2

In-community pricing (Reflection Pointe streets only): 9 single-family sales, average $1,658,333, range $1,035,000 to $2,800,000, average $377 per sq ft.

17. Comparable Sales Detail

Nearest routed sale in each permitted category:

- **Single-Family**: 4009 Beechwood Spring Ln (0.1 mi, $1,190,000 on 2025-06-10); 4017 Beechwood Spring Ln (0.1 mi, $1,365,000 on 2026-06-25); 1212 Reflection Pointe Blvd (0.5 mi, $1,035,000 on 2024-12-10)
- **Duplex**: 405 Gaston Ave (6.0 mi, $152,000 on 2025-06-02); 606 North St (6.0 mi, $410,000 on 2025-08-28)
- **Townhouse**: 1549 South Point Rd (1.1 mi, $274,000 on 2025-03-21); 121 Armstrong Rd (4.1 mi, $365,900 on 2026-08-07); 79 Seven Oaks Lndg (4.1 mi, $389,990 on 2026-08-05)

A representative slice of the comp set is reproduced in Appendix A; the full set is in `belmont_routed_comps.json`.

18. Land Sale Evidence — vacant lots in and around Reflection Pointe

The most direct evidence of what this lot is worth as a lot. County CAMA vacant-land sales (code 1000/1005) since 2022 within about 1.6 miles:

Address	Distance	Acres	Sold	Price	$/Acre
4012 Beechwood Spring Ln	0.02 mi	0.67	2022	$67,000	$100,000
4020 Beechwood Spring Ln	0.03 mi	0.55	2023	$80,000	$145,455
4213 Arbors Ford Ct	0.06 mi	0.57	2025	$50,000	$87,719
4000 Beechwood Spring Ln	0.08 mi	0.72	2024	$43,000	$59,722
4029 Beechwood Spring Ln	0.08 mi	0.86	2026	$135,000	$156,977
4208 Arbors Ford Ct	0.10 mi	0.51	2025	$165,000	$323,529
3025 Lake Pointe Dr	0.10 mi	0.68	2023	$100,000	$147,059
3112 Lake Pointe Dr	0.13 mi	0.64	2025	$80,000	$125,000
3020 Lake Pointe Dr	0.16 mi	0.67	2023	$25,000	$37,313
2069 Beauhaven Ln	0.17 mi	0.51	2022	$225,000	$441,176
3127 Lake Pointe Dr	0.17 mi	0.43	2025	$475,000	$1,104,651
4305 The Bluffs Way	0.18 mi	0.71	2025	$500,000	$704,225
2057 Beauhaven Ln	0.19 mi	0.54	2023	$160,000	$296,296
1208 Reflection Pointe Blvd	0.20 mi	0.58	2024	$87,000	$150,000
3200 Lake Pointe Dr	0.22 mi	0.81	2023	$50,000	$61,728
1300 Reflection Pointe Blvd	0.22 mi	0.85	2023	$82,500	$97,059
2028 Gladelynn Ct	0.22 mi	0.81	2025	$61,000	$75,309
1200 Reflection Pointe Blvd	0.22 mi	0.54	2025	$145,000	$268,519

Read this table as the market's own answer: **interior 0.5–0.9 acre lots in this community trade in the $43,000–$165,000 band**, with waterfront lots breaking away to $475,000–$500,000. The subject's $109,000 ask sits in the upper-middle of the interior-lot band, above the $69,500 and $135,000 asks on the same street and above its own $76,000 county value.

19. Land Valuation — 8% to 15% of Average ARV, by permitted type and driving band

Method: average sold price of comparable **built product** in each driving-distance band (never the median), multiplied by the number of lots/units, then taken at 8%–15%. Empty bands publish **0 Comps / N/A** — a range is never borrowed from a wider band. Uses the district does not permit publish **Not a permitted use** and carry no range at all.

Development use	0-1 mi	0-3 mi	0-6 mi
1 Single-Family Lot (8%-15% of Average ARV)	**$129,886 - $243,536** *(N=7)*	**$73,342 - $137,515** *(N=35)*	**$62,349 - $116,904** *(N=231)*
1 Duplex Structure · 2 Units (8%-15% of Average ARV)	**0 Comps / N/A**	**0 Comps / N/A**	**$44,960 - $84,300** *(N=2)*
1 Townhome Unit (8%-15% of Average ARV)	**0 Comps / N/A**	**$21,920 - $41,100** *(N=1)*	**$33,767 - $63,313** *(N=67)*
1 Triplex Structure (8%-15% of Average ARV)	**Not a permitted use**	**Not a permitted use**	**Not a permitted use**
1 Quadplex Structure (8%-15% of Average ARV)	**Not a permitted use**	**Not a permitted use**	**Not a permitted use**
Multi-Family Building Pad (8%-15% of Average ARV)	**Not a permitted use**	**Not a permitted use**	**Not a permitted use**
1 Mobile/Modular Unit (8%-15% of Average ARV)	**Not a permitted use**	**Not a permitted use**	**Not a permitted use**

How to read the numbers. The 0–1 mi single-family figure is the meaningful one for this parcel: it is priced from homes in the same community, where recent resales have closed at $1.19M–$1.37M and 2,000–4,600 sq ft homes carry roughly $333 per sq ft. The 0–3 and 0–6 mi rows blend in Belmont, Cramerton, Gastonia and the Charlotte/Clover edge of the radius, which drags the average ARV down — use them as a floor, not as the subject's value.

Cross-check against the land market — and the divergence, stated plainly. The 0–1 mi rule range is **$129,886 – $243,536**, but actual vacant lots in this community have traded at **$43,000–$165,000** (Section 18) and the subject is asking $109,000. The rule therefore sits **above the market**, and the reason is structural rather than an error: in a luxury enclave the finished home carries very high value per square foot ($333) while construction cost per square foot ($250–$375) absorbs most of it, so land captures roughly **4–6% of ARV, not 8–15%**. The rule measures what land *would* be worth if construction were cheap; the residual in Section 21 measures what a buyer can actually pay. Where they conflict, the residual and the land comps win — that is why lots on this street clear at $50,000–$165,000, not at $130,000–$244,000.

What that means for an offer. Treat the 0–1 mi range as a ceiling that only a buyer planning a very large, high-value house could approach, and treat the $43,000–$165,000 land comp band as the working market. An owner-builder who captures the builder margin can justify roughly **$222,000** for this lot and still build at parity with buying an existing home; a spec builder cannot justify the ask at all.

20. Zero-Comp & Not-Permitted Disclosure

Type	Status on this parcel	Basis
Triplex	Not a permitted use	Belmont G-R has no triplex building type; not priced
Quadplex	Not a permitted use	Belmont G-R has no quadplex building type; not priced
Multi-Family	Not a permitted use	No apartment building type in G-R; not priced
Mobile/Modular	Not a permitted use	Manufactured housing requires the separate MH-R district; covenants also prohibit manufactured and modular homes

Any cell reading **0 Comps / N/A** in Section 19 means the comp set genuinely contains no routed sale of that type in that band. No figure was carried over from an adjacent band.

21. Pro-Forma Scenarios

Assumptions, stated openly: construction at **$250–$375/sq ft** (2026 Charlotte-metro design-build custom range; Gaston County sits in the low-to-mid part of that range), soft costs (design/engineering/permits) at **8%** of hard cost, selling costs at **5%** of ARV, site work at **3%** of hard cost, and market value at **$333/sq ft** (the average $/sq ft of single-family sales within 1 driving mile of the parcel). Lot at the $109,000 ask. These are assumptions to be replaced with real bids, not quotes.

Scenario	HLA	$/sq ft	Hard cost	ARV	All-in incl. lot	Margin	Margin %
A — covenant minimum, low cost	2,400	$250	$600,000	$799,200	$814,960	-$15,760	-2.0%
B — community-typical, mid cost	4,000	$275	$1,100,000	$1,332,000	$1,396,600	-$64,600	-4.8%
C — community-typical, high cost	4,000	$375	$1,500,000	$1,332,000	$1,840,600	-$508,600	-38.2%
D — **owner-builder**, 4,000 sq ft, low cost, no selling cost	4,000	$250	$1,000,000	$1,332,000	$1,219,000	**$113,000**	8.5%

Reading the pro-forma honestly. Scenarios A–C are spec-builder cases and they all lose money at the current ask: the covenant minimum (A) is too small for this community's pricing, and at full cost (C) the build cannot be sold for what it costs. **Scenario D is the deal that actually happens on this street** — an owner-builder who skips the builder's profit and the selling costs and captures that spread as equity. It is also the check on the valuation: the owner-builder's break-even land figure is **$222,000**, which sits **above** the observed $43,000–$165,000 land band — i.e. an owner-builder can pay the $109,000 ask and still come out ahead of buying a finished comparable home, which is precisely why the lot is priced where it is. A spec builder buying at $119,000 and reselling faces a negative margin in every scenario, which is exactly why this lot has been on the market 255 days and why the prior listing at $129,000 was withdrawn.

22. What Can Actually Be Built

- **Entitled product:** one single-family detached house. That is the only product the covenants allow, and it is the product the zoning and market both support.
- **Maximum theoretical units:** 4.02 units at the 6 units/acre cap — but the 50% impervious limit, the 55 ft minimum lot width for a second frontage, and the single-family covenant make a two-lot split impractical. Do not underwrite a subdivision premium.
- **House size the lot supports:** the covenant floor is 2,000 sq ft (1-story) / 2,400 sq ft (2-story); the community norm is 4,000–4,600 sq ft; the 50% coverage limit and a 181 ft width comfortably carry the upper end.
- **Envelope:** approximately **24,001 sq ft** buildable under the detached-house setbacks before accounting for the 50% impervious cap and driveway.
- **Foundation:** plan on a walk-out/daylight basement or tall crawl space on the southwest side; the 37 ft fall makes a flat-slab-on-grade design expensive to grade.
- **Parking:** if the garage faces the street, a 30 ft parking pad is required from the right-of-way to the garage door — a detail that eats into the usable front yard on a lot this deep-narrow.

23. Major Development Risks & Red Flags

1. **Grade / foundation cost.** 37 ft of fall (~14%) is the single biggest budget risk. Get a grading plan and geotech before you set a price.
2. **Private road.** Beechwood Spring Ln is HOA-maintained and gated; there is no public street acceptance, and resurfacing special assessments are a normal occurrence in this type of community.
3. **Architectural review and covenant floor.** A 2,000/2,400 sq ft minimum with mandatory architectural review limits the buyer pool to people who intend to build a substantial custom home — and slows the entitlement path even though zoning is by right.
4. **Price versus evidence.** $109,000 against a $76,000 assessment and interior-lot sales of $43,000–$165,000 means the ask is at the top of the band; the prior listing at $129,000 was withdrawn. There is negotiating room.
5. **Thin builder margin at current construction costs.** See Section 21 — a spec builder at the covenant minimum loses money.
6. **New supply.** Lakeview Farms (479 SF + 52 MF units, proposed) will add competing new-construction supply in the same catchment.
7. **Marketing zoning errors.** Several portals label lots here "R-1"; anyone relying on that instead of the G-R district could misjudge what the covenants and the code jointly allow.

24. Positive Site Characteristics

- By-right single-family entitlement in a district that also lists duplex and townhouse, so no rezoning is needed for the core product.
- **City water and public sewer** available — removes the largest single unknown in rural land deals.
- **Zone X** with no SFHA, no floodway, no mapped wetlands or streams.
- **Direct paved frontage** on a platted street with an established address range — no easement-by-necessity exposure.
- Located in a **gated Lake Wylie community** with a marina, pool, courts and trails, where homes have resold at $1.19M–$1.37M in the last two years.

- Large lot for the street (0.67 ac vs a 0.55 ac mode) with a deep rear yard and 50% coverage headroom for a 4,000+ sq ft house.
- Only 20 ft of frontage setback and a rectangular-ish footprint — a clean, buildable envelope.

25. Due Diligence Checklist

1. **Recorded plat and deed** for PIN 3591-68-5246: confirm Lot 62 (portal label 'Unit L 62'), frontage dimension, and that the parcel is a legally separate building lot.
2. **Reflection Pointe declaration, architectural guidelines and current dues/reserve study** from Property Matters Realty LLC (704-861-0833) — including the minimum-HLA rule and the approved-builder process.
3. **City of Belmont utility availability / will-serve letter** for water and sewer, plus the current tap fee quote.
4. **Grading plan and geotechnical report** — the 13% slope is the deal's main cost variable.
5. **Belmont zoning verification letter** ($75 per the FY25-26 fee schedule) confirming G-R and permitted uses on the record.
6. **Title search** for easements along the frontage, drainage easements from uphill lots, and any marina/boat-slip rights.
7. **HOA road-maintenance obligations** and any pending special assessment.
8. **Stormwater / impervious-area limits** at permit stage under the current Belmont LDC.
9. **School assignment confirmation** with Gaston County Schools (Belmont Central / J B Page, Belmont Middle, South Point High per MLS).
10. **Builder bids** at 4,000 sq ft to replace the pro-forma assumptions in Section 21.

26. Scoring & AI Conclusion

Criterion	Max	Awarded	Basis
Entitlement — by-right single-family use, no rezoning required	20	**18**	G-R permits it by right; townhouse-on-infill is excluded and the covenants narrow it further
Utilities — public water and sewer available	15	**15**	Reported available; removes well/septic risk entirely
Access & frontage — legal, paved, direct	10	**7**	Direct frontage and an existing address range, but the street is private and gated
Environmental — flood, wetlands, streams	10	**10**	Zone X, no SFHA, no floodway, no mapped wetlands
Terrain & buildability	15	**9**	~37 ft of relief at ~14% grade forces a walk-out foundation and extra site work
Market depth & ARV support	15	**13**	231 single-family sales within 6 driving miles; in-community resales at $1.19M-$1.37M
Price versus value evidence	10	**3**	Ask $119,000 vs $76,000 county value, $43,000-$165,000 land comps, prior $129,000 listing withdrawn
Development control & flexibility	5	**2**	Architectural review, 2,000/2,400 sq ft floor, no modular/manufactured, single-family only
Land Feasibility Score	**100**	**77**	Feasible for a custom single-family home, subject to price discipline

Rating	Score	Meaning
Land Feasibility Score	**77/100**	Feasible for a custom single-family home, subject to price discipline
Buildability	**8/10**	Utilities, frontage, entitlement and flood all resolved; grade is the only real site obstacle
Development risk	**Moderate**	Covenant-controlled, private-road community; construction-cost and grade risk dominate
Highest & best use	**One custom single-family home, 2,400–4,600 sq ft**	Consistent with zoning, covenants and the built pattern on the street
Land value indication	See Section 19 (0–1 mi band) and Section 18 (land comps)	The 8%–15% rule and the vacant-lot sales bracket the ask

Conclusion. 4012 Beechwood Spring Ln is a **genuinely buildable, low-entitlement-risk lot** — the rare case where zoning, utilities, access and flood all resolve in the buyer's favour on day one. Its value is not in what you can squeeze onto it but in where it sits: a gated Lake Wylie community where the houses sell for seven figures. The constraints are all about **cost and control**, not permission: roughly 14% grade that forces a walk-out foundation, an HOA architectural-review process with a 2,000/2,400 sq ft floor and a ban on manufactured and modular construction, and a private road the HOA — not the city — maintains.

At $109,000 the ask sits at the upper edge of the evidence: interior lots in this community have traded at $43,000–$165,000, the county carries the parcel at $76,000, the ask has already been cut twice (listed 2026-02-20 at $119,000 (MLS 4346398); reduced to $109,000; prior listing #4273484 at $129,000 withdrawn 2025-12-08). **A disciplined offer in the $75,000–$95,000 range is defensible on the land comps and on the 8%–15% rule at the covenant-minimum house size; even at the current $109,000 ask you are paying a premium over the county value and the interior-lot comps for the community rather than for buildable value.** The buyer this lot fits is an owner-builder or a custom builder with a signed contract — not a speculator underwriting a speculative resale.
