

Land Feasibility Report — 2830 COURT DR (Gastonia, NC)

Feasibility Rating: **Moderate** · Recommendation: **Evaluate further** · Generated 2026-08-16

1. Executive Summary

The subject is a **0.67-acre vacant parcel** at 2830 COURT DR, Gastonia, NC (Parcel ID **307097**, PIN 3566-41-2470), zoned **RS-8 — RS-8 Single-Family Residential** under Gastonia. Recorded owner: **TEN CONSTRUCTION LLC**. **Buildability screening:** the parcel is **buildable** under the report's screening rules — **inside the FEMA Special Flood Hazard Area** (Zone AE, SFHA_TF = T, **within a mapped floodway**), with road frontage and a sampled gradient of **8.4%** (center elevation 222.1 m). Zoning permits **Single-Family** residential use at a minimum lot of **8,000 sq ft** and a density of 5.4 du/ac.

Subdivision potential: at the current district standards the tract yields **3 buildable lots** (gross 3 before 90% infrastructure efficiency). **Flood caveat:** the lot-yield model is area-based and does not subtract the SFHA footprint — the number of lots that are actually buildable above BFE and outside the floodway will be materially lower than the gross yield above; obtain a floodplain survey before relying on any lot count.

Market anchor: 81 successfully routed, verified sold new-construction comps average **\$397,935**; the 8–15% land-value band is **\$31,835–\$59,690 per finished lot** (\$95,505–\$179,070 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-132,358/lot** (-33.3% of ARV) — cross-checked in Section 23.

Overall rating: Moderate — Evaluate further.

2. Property Overview

Field	Value
Address	2830 COURT DR, Gastonia, NC 28054
Parcel ID / PIN	307097 / 3566-41-2470
Acres	0.67
Assessed land value	\$2,660
Total parcel value	\$2,660
Property class (code)	1000
Owner	TEN CONSTRUCTION LLC
Jurisdiction	Gastonia

3. Parcel Verification

Field	Value
Parcel ID	307097
PIN	3566-41-2470
Owner of record	TEN CONSTRUCTION LLC
Mailing address	P O BOX 35555, CHARLOTTE, NC 28202
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District:** **RS-8 — RS-8 Single-Family Residential**
- **Jurisdiction:** Gastonia · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached
- **Allowed building types:** Single-Family

Dimensional standards — ordinance-reference screening values:

Standard	Value
Minimum lot area	8,000 sq ft
Minimum lot width	60 ft
Density	5.4 du/ac
Maximum height	45 ft
Front setback	30 ft
Side setback	8 ft
Rear setback	30 ft
- Table 7.3-1 Bulk & Use Chart (as amended by Ord. 24-802): minimum lot area 8,000 sq ft; minimum lot width 60 ft; front setback 30 ft; side setback 8 ft; rear setback 30 ft; max height 45 ft.	
- Side yards abutting a public or private street require an additional 10 ft above the listed side setback (note 1).	
- Existing lots with a width of less than 60 ft may use a 5-ft side yard setback (note 3).	
- New lots created by subdivision follow Section 8.1.11 (R-1/R-2/R-3 districts) standards per footnote 6, so a subdivision yield scenario must be evaluated under those larger minimums rather than the 8,000 sq ft chart value.	
- Source (adopted standards): City of Gastonia Unified Development Ordinance, Table 7.3-1 as amended by Ord. 24-802 — https://www.gastonianc.gov/images/files/planning/UDO/24-802_JAN_CC_Amendment_Final.pdf	
- Confirm the currently effective ordinance text, parcel-specific overlays/conditions, and surveyed dimensions with the jurisdiction before relying on these screening values or lot yield.	

5. Future Land Use Analysis

- Verified: the City of Gastonia 2025 Comprehensive Plan and Gaston County's 2035 Comprehensive Land Use Plan establish the long-range future-land-use policy framework; the parcel-specific designation is resolved in the city plan below.[1]
- Verified: per the Gastonia 2025 Comprehensive Plan Northeast Sector Future Land Use Map (Figure 13-12), the Smyre neighborhood area along and north/east of Court Dr — including the 2830 Court Dr parcels — is designated Residential; the Gaston Memorial Hospital campus west/south of Court Dr is Public/Institutional, and the Court Drive mixed-use area near the hospital is limited to hospital-related uses.[9]
- Confirm the adopted map designation before concluding whether the current RS-8 district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** RS-8 (RS-8 Single-Family Residential) at 5.4 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone requiring a rezoning application, site plan, and public hearing; Gastonia rezoning is discretionary and evaluated against the city's 2025 Comprehensive Plan FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); rezoning duration is **Unknown** and jurisdiction-confirmed timing, fees, and entitlement risk must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	0.67 acres
Minimum lot size	8,000 sq ft
Gross (theoretical) lots	3
Infrastructure efficiency	90%
Net buildable lots	3
- Flood adjustment (required): this is an area-based yield and ignores the SFHA/floodway footprint . The parcel center is inside Zone AE (SFHA), so lots must be sited above BFE and outside the floodway; expect the real conforming-lot count to be lower. A floodplain survey and site plan are required	

Metric	Value
before any lot-count commitment.	
- Process: Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 60 ft; setbacks front 30 / side 8 / rear 30 ft), the NC Building Code, and Gastonia building/development permits.
- **HOA / covenants:** no homeowners' association was identified for this plat (Leonard Ramsey, Plat Book 96 / Page 22) or the Smyre neighborhood in online public records and neighborhood searches — the plat is a small two-lot infill split with no association on file. A recorded declaration in the deed chain could still impose restrictions; check the chain at closing.
- **Builder restrictions:** no architectural review committee or approved-builder program was found for this plat; any restrictions would appear only in the recorded deed chain.

9. Buildability Assessment

- **BUILDABLE SCREENING RESULT** — sampled gradient 8.4% (<15%), subject to a mapped flood hazard at the parcel center (Section 11), with road frontage. This does not establish parcel-wide buildability; confirm with survey, geotechnical/site design, utilities, drainage, floodplain, and permits.
- Internal screening thresholds: under 15% = lower slope concern; 15–25% = engineering review; over 25% = high concern. These are not USGS classifications.

10. Topography and Slope Analysis

- Approximate five-point screening gradient: **8.4%** · Center elevation: **222.1 m** · Source: USGS Elevation Point Query Service (five-point screening sample).
- Method: four point-to-center gradients from elevations sampled about 80–90 m around the parcel centroid. This is not a parcel-wide topographic survey or maximum-slope determination.
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **INSIDE the FEMA Special Flood Hazard Area** — Zone **AE** (SFHA_TF = T) at the parcel center. **The parcel center falls within a mapped FLOODWAY**, where new construction is generally prohibited absent an engineered no-rise/no-impact analysis and local approval.
- Flood insurance is required for federally regulated lenders under the NFIP mandatory-purchase rule; floodplain development requires permitting, and the buildable pad must be located above the Base Flood Elevation and outside the floodway.
- Source: FEMA National Flood Hazard Layer (Flood Hazard Zones), queried by parcel center coordinate (FIRM panel 37071C_STUDY4).
- A parcel-wide flood determination (exact buildable acreage above BFE, floodway boundaries vs. lot lines) requires a surveyor/engineer's Letter of Map Amendment (LOMA) or detailed site analysis before any design or offer.
- *Interactive source: FEMA Flood Map Service Center — <https://msc.fema.gov>*

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities candidate — service unconfirmed	Unknown — obtain provider quote

Service	Provider / scenario	Est. cost
Sewer tap	Two Rivers Utilities candidate — service unconfirmed	Unknown — obtain provider quote
Building permit	Gaston County (enforces state codes in Gastonia) + city zoning permit	\$990 minimum new-residential; \$100 city zoning work-item fee
- Verified: the official City of Gastonia FY2026 Fee Schedule contains a Two Rivers Utilities system-development, assessment-rate, and tap-fee schedule. The extracted table did not preserve enough row/column structure to validate a parcel's applicable meter category or exact connection total; parcel provider, service availability, meter category, extensions, and fees remain Unknown pending a provider quote.[8]		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Verified: Gaston County enforces the state building codes inside Gastonia — the county's minimum fee for a new residential home is \$990 (valuation-based using ICC tables or contract price, whichever is greater), plus a \$100 city zoning-permit work-item fee for a new single-family dwelling and 20% plan-check on first review.[12]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Verified: Gaston County Schools' official address-based locator (School Year 2025–26) assigns 2830 Court Dr, Gastonia to Lowell Elementary (PK–5), Holbrook Middle (6–8), and Ashbrook High (9–12).[10]
- Parcel-specific school assignments are from the district's official address-based locator; verify at enrollment with the district and route the actual site to intended employment centers.

16. Market Analysis

County conclusion: Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28054:** Verified ZIP 28054 (Gastonia) market snapshot, Realtor.com Economic Research August 2026: median listing \$297,450 (-10.22% YoY), median sold \$274,950, \$182/sq ft, 188 active listings, 57 median days on market, 99% sale-to-list ratio (warm/seller's market), median rent \$1,355/mo.[11] - **Derived new-construction comp range:** routed verified closings in Section 19 range **\$237,425–\$819,000**, ranging \$147–\$251/sq ft; the displayed ~90%–110% range is a scenario bracket, not an independently verified ARV appraisal, for a ~1,949 sq ft home. - **Vacant-land listing benchmark:** Verified vacant-land listing benchmark: Zillow shows 27 land/lot listings in Gastonia ZIP 28054; representative residential infill lots range ~\$28,000–\$105,000 (e.g., 215 N Chestnut St \$28,000; 1122 Midway Dr \$40,000; 0 Moss Ct \$50,000; 1618 Heatherloch Dr \$79,900; 819 S Chestnut St \$105,000), with larger/improved lots above \$100,000.[13]

17. Market Saturation & Absorption by Product Type

Conclusion: Product-level inventory and absorption are **Unknown** in the validated evidence packet — county-wide and ZIP-level snapshots are provided in Section 16; product-level data are not relabeled as verified facts.

Product type	Active inventory	Absorption / DOM	Months of supply
Single-family detached	Unknown	Unknown	Unknown
Townhome / attached	Unknown	Unknown	Unknown
Condo	Unknown	Unknown	Unknown
Multifamily / rental	Unknown	Unknown	Unknown
- County-wide context only: Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED			

Product type	Active inventory	Absorption / DOM	Months of supply
independently reports 56 median days on market for July 2026.[3][4]			
- Do not infer a product ranking or product-specific build recommendation without verified product-level inventory and closing data.			

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **81** sold comps:

Estimated land price by search radius (1–5 miles):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15% of ARV)
1 mi	2	\$245,000	\$206	\$19,600–\$36,750
3 mi	17	\$304,512	\$214	\$24,361–\$45,677
5 mi	81	\$397,935	\$194	\$31,835–\$59,690
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 81 disclosed closed sales; radius count and the internal 8–15% scenario band use only verified primary comps with successful in-radius Google driving routes. Straight-line miles are display-only. Section 22 reconciles the scenario band to pro-forma residual land value.				

Bottom Line: 81 successfully routed verified new-construction closings averaging **\$397,935** (avg **\$194/sqft**), ranging \$237,425–\$819,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app's internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. Every amount is an illustrative model allowance, not a provider quote or independently verified fee; obtain current

parcel-specific bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building-permit model allowance	\$14,500
Illustrative utility connection / well-septic contingency	\$12,500 model allowance; not a provider quote
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- \$185/sq ft internal underwriting stress assumption: scaled to the comps' median 1,949 sq ft, modeled hard cost ≈ \$360,565 ; this intentionally conservative scenario is separate from the retrieved regional benchmark and requires bid validation. Add soft/selling/financing and site-specific costs before relying on residual land value.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (RS-8), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- **Floodplain override:** the SFHA condition at this parcel caps the highest-and-best-use conclusion — development is limited to buildable area above BFE and outside the floodway, and the residual land value must be discounted for the reduced buildable footprint, required flood insurance, and permitting risk.
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: the 8–15%–of-ARV output is an internal scenario band calculated from routed comp prices; it is not an externally verified finished-lot market rule. It is compared with the residual pro forma (Section 23) and tax assessment, while current vacant-land listing evidence remains Unknown.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$31,835–\$59,690
Whole-parcel value (band × 3 lots)	\$95,505–\$179,070
Implied per-acre (single-lot basis)	\$47,515–\$89,090
Builder residual land value @ 20% profit	\$-132,358/lot
Assessed land value (tax)	\$2,660
Vacant-land market (listings)	Verified vacant-land listing benchmark: Zillow shows 27 land/lot listings in Gastonia ZIP 28054; representative residential infill lots range ~\$28,000–\$105,000 (e.g., 215 N Chestnut St \$28,000; 1122 Midway Dr \$40,000; 0 Moss Ct \$50,000; 1618 Heatherloch Dr \$79,900; 819 S Chestnut St \$105,000), with larger/improved lots above \$100,000.[13]
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]

Internal scenario: the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. The 20% profit case, when available, produces a calculated residual result, not an external rule of thumb for finished-lot value. Residual land value pro forma — ARV \$397,935 (median comp), 1,949 sq ft home @ \$185/sq ft, 3 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$397,935	\$360,565	\$90,141	\$59,690	\$-112,462
20%	\$397,935	\$360,565	\$90,141	\$79,587	\$-132,358
25%	\$397,935	\$360,565	\$90,141	\$99,484	\$-152,255
- At 20% profit, residual land = \$-132,358/lot ≈ -33.3% of ARV .					
- The 20% figure above is the selected developer-profit scenario; its residual is a calculated residual result, not an external rule of thumb for finished-lot value.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Floodplain — INSIDE SFHA (Zone AE, SFHA_TF = T); within mapped floodway	High	Verify buildable acreage above BFE and outside the floodway; carry NFIP insurance and floodplain permitting in underwriting.
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown	Medium	Complete title work and review deeds, plats, and recorded declarations.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Evaluate further** — Feasibility Rating: **Moderate**. The parcel requires further verification (future land use, utility availability, and minimum lot size) before committing.

- **Most likely strategy:** Single-family residential development (subdivide to ~3 lots).
- **Primary risks:** the items rated Medium and High in Section 24 (floodplain, slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest screening indicators:** sampled lower-slope condition, road frontage, verified comp market, ordinance-reference lot-yield scenario — but **the SFHA/floodway condition is the overriding constraint** and materially reduces buildable area and value.

A direct official FY2026 City fee-schedule PDF was recovered, but extracted table structure was insufficient to assign an exact fee or meter category to a parcel; obtain a provider quote. - User-facing listing page returned HTTP 403 (Akamai WAF) to Firecrawl and browser fallback; no current vacant-land listing-price range is treated as verified evidence.

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS Elevation Point Query Service + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning + Firecrawl evidence retrieval).

Land Feasibility Report — 2830 COURT DR (Gastonia, NC)

Feasibility Rating: **Moderate** · Recommendation: **Evaluate further** · Generated 2026-08-16

1. Executive Summary

The subject is a **0.31-acre vacant parcel** at 2830 COURT DR, Gastonia, NC (Parcel ID **307098**, PIN 3566-41-2360), zoned **RS-8 — RS-8 Single-Family Residential** under Gastonia. Recorded owner: **TEN CONSTRUCTION LLC**. **Buildability screening:** the parcel is **buildable** under the report's screening rules — **inside the FEMA Special Flood Hazard Area** (Zone AE, SFHA_TF = T), with road frontage and a sampled gradient of **6.3%** (center elevation 222.2 m). Zoning permits **Single-Family** residential use at a minimum lot of **8,000 sq ft** and a density of 5.4 du/ac.

Market anchor: 81 successfully routed, verified sold new-construction comps average **\$397,935**; the 8–15% land-value band is **\$31,835–\$59,690 per finished lot**.

Overall rating: Moderate — Evaluate further.

2. Property Overview

Field	Value
Address	2830 COURT DR, Gastonia, NC 28054
Parcel ID / PIN	307098 / 3566-41-2360
Acres	0.31

Field	Value
Assessed land value	\$1,230
Total parcel value	\$1,230
Property class (code)	1000
Owner	TEN CONSTRUCTION LLC
Jurisdiction	Gastonia

3. Parcel Verification

Field	Value
Parcel ID	307098
PIN	3566-41-2360
Owner of record	TEN CONSTRUCTION LLC
Mailing address	P O BOX 35555, CHARLOTTE, NC 28202
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District: RS-8** — RS-8 Single-Family Residential
- **Jurisdiction:** Gastonia · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached
- **Allowed building types:** Single-Family

Dimensional standards — ordinance-reference screening values:

Standard	Value
Minimum lot area	8,000 sq ft
Minimum lot width	60 ft
Density	5.4 du/ac
Maximum height	45 ft
Front setback	30 ft
Side setback	8 ft
Rear setback	30 ft
- Table 7.3-1 Bulk & Use Chart (as amended by Ord. 24-802): minimum lot area 8,000 sq ft; minimum lot width 60 ft; front setback 30 ft; side setback 8 ft; rear setback 30 ft; max height 45 ft.	
- Side yards abutting a public or private street require an additional 10 ft above the listed side setback (note 1).	
- Existing lots with a width of less than 60 ft may use a 5-ft side yard setback (note 3).	
- New lots created by subdivision follow Section 8.1.11 (R-1/R-2/R-3 districts) standards per footnote 6, so a subdivision yield scenario must be evaluated under those larger minimums rather than the 8,000 sq ft chart value.	
- <i>Source (adopted standards): City of Gastonia Unified Development Ordinance, Table 7.3-1 as amended by Ord. 24-802 — https://www.gastonianc.gov/images/files/planning/UDO/24-802_JAN_CC_Amendment_Final.pdf</i>	
- Confirm the currently effective ordinance text, parcel-specific overlays/conditions, and surveyed dimensions with the jurisdiction before relying on these screening values or lot yield.	

5. Future Land Use Analysis

- Verified: the City of Gastonia 2025 Comprehensive Plan and Gaston County's 2035 Comprehensive Land Use Plan establish the long-range future-land-use policy framework; the parcel-specific designation is resolved in the city plan below.[1]
- Verified: per the Gastonia 2025 Comprehensive Plan Northeast Sector Future Land Use Map (Figure 13-12), the Smyre neighborhood area along and north/east of Court Dr — including the 2830 Court Dr parcels — is designated Residential; the

Gaston Memorial Hospital campus west/south of Court Dr is Public/Institutional, and the Court Drive mixed-use area near the hospital is limited to hospital-related uses.[9]

- Confirm the adopted map designation before concluding whether the current RS-8 district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** RS-8 (RS-8 Single-Family Residential) at 5.4 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone requiring a rezoning application, site plan, and public hearing; Gastonia rezoning is discretionary and evaluated against the city's 2025 Comprehensive Plan FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); rezoning duration is **Unknown** and jurisdiction-confirmed timing, fees, and entitlement risk must be netted against that uplift.

7. Subdivision & Lot-Split Potential

- No subdivision yield computed — the district's minimum lot size is not established, or the parcel is too small to split.
- **Process:** Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]
- **Value uplift:** the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 60 ft; setbacks front 30 / side 8 / rear 30 ft), the NC Building Code, and Gastonia building/development permits.
- **HOA / covenants:** no homeowners' association was identified for this plat (Leonard Ramsey, Plat Book 96 / Page 22) or the Smyre neighborhood in online public records and neighborhood searches — the plat is a small two-lot infill split with no association on file. A recorded declaration in the deed chain could still impose restrictions; check the chain at closing.
- **Builder restrictions:** no architectural review committee or approved-builder program was found for this plat; any restrictions would appear only in the recorded deed chain.

9. Buildability Assessment

- **BUILDABLE SCREENING RESULT** — sampled gradient 6.3% (<15%), subject to a mapped flood hazard at the parcel center (Section 11), with road frontage. This does not establish parcel-wide buildability; confirm with survey, geotechnical/site design, utilities, drainage, floodplain, and permits.
- Internal screening thresholds: under 15% = lower slope concern; 15–25% = engineering review; over 25% = high concern. These are not USGS classifications.

10. Topography and Slope Analysis

- Approximate five-point screening gradient: **6.3%** · Center elevation: **222.2 m** · Source: USGS Elevation Point Query Service (five-point screening sample).
- Method: four point-to-center gradients from elevations sampled about 80–90 m around the parcel centroid. This is not a parcel-wide topographic survey or maximum-slope determination.
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **INSIDE the FEMA Special Flood Hazard Area** — Zone **AE** (SFHA_TF = T) at the parcel center.
- Flood insurance is required for federally regulated lenders under the NFIP mandatory-purchase rule; floodplain development requires permitting, and the buildable pad must be located above the Base Flood Elevation and outside the floodway.
- Source: FEMA National Flood Hazard Layer (Flood Hazard Zones), queried by parcel center coordinate (FIRM panel 37071C_STUDY4).

- A parcel-wide flood determination (exact buildable acreage above BFE, floodway boundaries vs. lot lines) requires a surveyor/engineer's Letter of Map Amendment (LOMA) or detailed site analysis before any design or offer.
- *Interactive source: FEMA Flood Map Service Center — <https://msc.fema.gov>*

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities candidate — service unconfirmed	Unknown — obtain provider quote
Sewer tap	Two Rivers Utilities candidate — service unconfirmed	Unknown — obtain provider quote
Building permit	Gaston County (enforces state codes in Gastonia) + city zoning permit	\$990 minimum new-residential; \$100 city zoning work-item fee
- Verified: the official City of Gastonia FY2026 Fee Schedule contains a Two Rivers Utilities system-development, assessment-rate, and tap-fee schedule. The extracted table did not preserve enough row/column structure to validate a parcel's applicable meter category or exact connection total; parcel provider, service availability, meter category, extensions, and fees remain Unknown pending a provider quote.[8]		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Verified: Gaston County enforces the state building codes inside Gastonia — the county's minimum fee for a new residential home is \$990 (valuation-based using ICC tables or contract price, whichever is greater), plus a \$100 city zoning-permit work-item fee for a new single-family dwelling and 20% plan-check on first review.[12]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Verified: Gaston County Schools' official address-based locator (School Year 2025–26) assigns 2830 Court Dr, Gastonia to Lowell Elementary (PK–5), Holbrook Middle (6–8), and Ashbrook High (9–12).[10]
- Parcel-specific school assignments are from the district's official address-based locator; verify at enrollment with the district and route the actual site to intended employment centers.

16. Market Analysis

County conclusion: Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28054:** Verified ZIP 28054 (Gastonia) market snapshot, Realtor.com Economic Research August 2026: median listing \$297,450 (-10.22% YoY), median sold \$274,950, \$182/sq ft, 188 active listings, 57 median days on market, 99% sale-to-list ratio (warm/seller's market), median rent \$1,355/mo.[11] - **Derived new-construction comp range:** routed verified closings in Section 19 range **\$237,425–\$819,000**, ranging \$147–\$251/sq ft; the displayed ~90%–110% range is a scenario bracket, not an independently verified ARV appraisal, for a ~1,949 sq ft home. - **Vacant-land listing benchmark:** Verified vacant-land listing benchmark: Zillow shows 27 land/lot listings in Gastonia ZIP 28054; representative residential infill lots range ~\$28,000–\$105,000 (e.g., 215 N Chestnut St \$28,000;

1122 Midway Dr \$40,000; 0 Moss Ct \$50,000; 1618 Heatherloch Dr \$79,900; 819 S Chestnut St \$105,000), with larger/improved lots above \$100,000.[13]

17. Market Saturation & Absorption by Product Type

Conclusion: Product-level inventory and absorption are **Unknown** in the validated evidence packet — county-wide and ZIP-level snapshots are provided in Section 16; product-level data are not relabeled as verified facts.

Product type	Active inventory	Absorption / DOM	Months of supply
Single-family detached	Unknown	Unknown	Unknown
Townhome / attached	Unknown	Unknown	Unknown
Condo	Unknown	Unknown	Unknown
Multifamily / rental	Unknown	Unknown	Unknown
- County-wide context only: Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4]			
- Do not infer a product ranking or product-specific build recommendation without verified product-level inventory and closing data.			

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **81** sold comps:

Estimated land price by search radius (1–5 miles):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15% of ARV)
1 mi	2	\$245,000	\$206	\$19,600–\$36,750
3 mi	17	\$304,512	\$214	\$24,361–\$45,677

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15% of ARV)
5 mi	81	\$397,935	\$194	\$31,835– \$59,690
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 81 disclosed closed sales; radius count and the internal 8–15% scenario band use only verified primary comps with successful in-radius Google driving routes. Straight-line miles are display-only. Section 22 reconciles the scenario band to pro-forma residual land value.				

Bottom Line: 81 successfully routed verified new-construction closings averaging **\$397,935** (avg **\$194/sqft**), ranging \$237,425–\$819,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app's internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. Every amount is an illustrative model allowance, not a provider quote or independently verified fee; obtain current parcel-specific bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building-permit model allowance	\$14,500
Illustrative utility connection / well-septic contingency	\$12,500 model allowance; not a provider quote
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000

Line item	Baseline (1,600 sq ft)
Total hard cost	\$250,000
- \$185/sq ft internal underwriting stress assumption: this model input is disclosed for consistency but no residual calculation is produced without sufficient routed comps and lot-yield inputs.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (RS-8), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- **Floodplain override:** the SFHA condition at this parcel caps the highest-and-best-use conclusion — development is limited to buildable area above BFE and outside the floodway, and the residual land value must be discounted for the reduced buildable footprint, required flood insurance, and permitting risk.
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: the 8–15%-of-ARV output is an internal scenario band calculated from routed comp prices; it is not an externally verified finished-lot market rule. It is compared with the residual pro forma (Section 23) and tax assessment, while current vacant-land listing evidence remains Unknown.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$31,835–\$59,690
Implied per-acre (single-lot basis)	\$102,694–\$192,548
Assessed land value (tax)	\$1,230
Vacant-land market (listings)	Verified vacant-land listing benchmark: Zillow shows 27 land/lot listings in Gastonia ZIP 28054; representative residential infill lots range ~\$28,000–\$105,000 (e.g., 215 N Chestnut St \$28,000; 1122 Midway Dr \$40,000; 0 Moss Ct \$50,000; 1618 Heatherloch Dr \$79,900; 819 S Chestnut St \$105,000), with larger/improved lots above \$100,000.[13]
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]

Internal scenario: the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. The 20% profit case, when available, produces a calculated residual result, not an external rule of thumb for finished-lot value. - Insufficient comps for a residual-land-value pro forma.

24. Risk Assessment

Risk	Severity	Mitigation
Floodplain — INSIDE SFHA (Zone AE, SFHA_TF = T)	High	Verify buildable acreage above BFE and outside the floodway; carry NFIP insurance and floodplain permitting in underwriting.
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown	Medium	Complete title work and review deeds, plats, and recorded declarations.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Evaluate further** — Feasibility Rating: **Moderate**. The parcel requires further verification (future land use, utility availability, and minimum lot size) before committing.
- **Most likely strategy**: Single-family residential development.
- **Primary risks**: the items rated Medium and High in Section 24 (floodplain, slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest screening indicators**: sampled lower-slope condition, road frontage, verified comp market, ordinance-reference lot-yield scenario — but **the SFHA/floodway condition is the overriding constraint** and materially reduces buildable area and value.

Firecrawl retrieval date: **2026-08-16**. Numbered citations map to the deduplicated sources below. 1. **2035 Comprehensive Land Use Plan** — Gaston County, NC. <https://www.gastongov.com/387/2035-Comprehensive-Land-Use-Plan> (retrieved 2026-08-16). 2. **FY26 Building & Development Services Fee Schedule** — Gaston County, NC. <https://www.gastongov.com/DocumentCenter/View/7877/FY26-Building-and-Development-Services-Fee-Schedule-PDF> (retrieved 2026-08-16). 3. **Gaston County Housing Market Report** — Realtor.com. <https://www.realtor.com/local/market/north-carolina/gaston-county> (retrieved 2026-08-16). 4. **Housing Inventory: Median Days on Market in Gaston County, NC** — FRED, Federal Reserve Bank of St. Louis. <https://fred.stlouisfed.org/series/MEDDAYONMAR37071> (retrieved 2026-08-16). 5. **Current North Carolina Mortgage & Refinance Rates** — Bankrate. <https://www.bankrate.com/mortgages/mortgage-rates/north-carolina/> (retrieved 2026-08-16). 6. **Cost to Build a House in Charlotte, NC (2026)** — CostToBuildHouse. <https://www.costtobuildhouse.com/charlotte-nc> (retrieved 2026-08-16). 7. **Gaston County Schools (2026)** — Public School Review. <https://www.publicschoolreview.com/north-carolina/gaston-county-schools-school-district/3701620-school-district> (retrieved 2026-08-16). 8. **City of Gastonia FY 2026 Fee Schedule — Two Rivers Utilities (Water & Sewer)** — City of Gastonia, NC. https://www.gastonianc.gov/images/Finance/FY_2026/City_of_Gastonia_FY_2026_Fee_Schedule_-_Effective_January_1st_2026.pdf (retrieved 2026-08-16). 9. **Gastonia 2025 Comprehensive Plan — Chapter 13 Land Use & Development (incl. Northeast Sector Future Land Use Map)** — City of Gastonia, NC. <https://www.gastonianc.gov/images/files/planning/documents/2025/13-LandUseFinal.pdf> (retrieved 2026-08-16). 10. **Gaston County Schools — Which School do I Attend? (BusPlanner eligibility locator, 2025–26)** — Gaston County Schools, NC. <https://gaston.mybusplanner.com/Eligibility> (retrieved 2026-08-16). 11. **28054 Housing Market Data — Gastonia, NC (Realtor.com Economic Research, Aug 2026)** — Realtor.com. <https://www.realtor.com/local/market/north-carolina/zipcode-28054> (retrieved 2026-08-16). 12. **Gastonia, NC — Building Permit Guide (Gaston County enforces state codes in Gastonia)** — Jaspector (verified April 2026). <https://www.jaspector.com/permits/north-carolina/gaston/gastonia/> (retrieved 2026-08-16). 13. **Gastonia, NC 28054 — Land & Lots For Sale (Zillow)** — Zillow. <https://www.zillow.com/gastonia-nc-28054/land/> (retrieved 2026-08-16). **Research retrieval limitations:** - The selected Two Rivers web page returned HTTP 404. A direct official FY2026 City fee-schedule PDF was recovered, but extracted table structure was insufficient to assign an exact fee or meter category to a parcel; obtain a provider quote. - User-facing listing page returned HTTP 403 (Akamai WAF) to Firecrawl and browser fallback; no current vacant-land listing-price range is treated as verified evidence.

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS Elevation Point Query Service + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning + Firecrawl evidence retrieval).
