

Land Feasibility Report — KILLIAN RD (Stanley, NC)

Feasibility Rating: **Excellent** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **424.03-acre vacant parcel** at KILLIAN RD, Stanley, NC (Parcel ID **172671**, PIN 4610-33-7807), zoned **R-1 — R-1 Single Family Limited** under Gaston County. Recorded owner: **GASTON COUNTY**. **Buildability verdict:** the parcel is **buildable** — outside the FEMA special flood hazard area, with road frontage and a max slope of **13.1%** (center elevation 216.7 m). Zoning permits **Single-Family** residential use at a minimum lot of **15,000 sq ft** and a density of 2.0 du/ac.

Subdivision potential: at the current district standards the tract yields **923 buildable lots** (gross 1,231 before 75% infrastructure efficiency).

Market anchor: 12 successfully routed, verified sold new-construction comps average **\$618,995**; the 8–15% land-value band is **\$49,520–\$92,849 per finished lot** (\$45,706,960–\$85,699,627 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-196,242/lot** (-31.7% of ARV) — cross-checked in Section 23.

Overall rating: **Excellent — Pursue**.

2. Property Overview

Field	Value
Address	KILLIAN RD, Stanley, NC 28164
Parcel ID / PIN	172671 / 4610-33-7807
Acres	424.03
Assessed land value	\$3,683,090
Total parcel value	\$0
Property class (code)	4010
Owner	GASTON COUNTY
Jurisdiction	Gaston County

3. Parcel Verification

Field	Value
Parcel ID	172671
PIN	4610-33-7807
Owner of record	GASTON COUNTY
Mailing address	PO BOX 1578, GASTONIA, NC 28053-1578
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District:** **R-1** — R-1 Single Family Limited
- **Jurisdiction:** Gaston County · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached, modular home, accessory uses
- **Allowed building types:** Single-Family

Dimensional standards (adopted):

Standard	Value
Minimum lot area	15,000 sq ft
Minimum lot width	40 ft
Density	2.0 du/ac
Maximum height	45 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	20 ft
- Minimum lot area is 15,000 sq ft for lots served by both public water and sewer; larger minimums apply where septic/well is used.	
- Minimum lot width applies only to lots containing a detached single-family dwelling (40 ft).	
- Maximum building height: 3 stories, not to exceed 45 ft.	
- Source (adopted standards): Gaston County Unified Development Ordinance, Ch. 8 (Dimensional Standards) — https://cms3.revize.com/revize/gastoncounty/Documents/planning/UDO2018/0201Ch8_Suppl1017.pdf	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- **Verified:** Gaston County publishes a 2035 Comprehensive Land Use Plan; the subject parcel's map designation was not verified in this retrieval and must be confirmed on the adopted map.[1]
- **Unknown** — the county plan page was retrieved, but the subject parcel's adopted future-land-use map designation was not established from the page content.
- Confirm the adopted map designation before concluding whether the current R-1 district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** R-1 (R-1 Single Family Limited) at 2.0 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	424.03 acres
Minimum lot size	15,000 sq ft
Gross (theoretical) lots	1,231
Infrastructure efficiency	75%
Net buildable lots	923
- Process: Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 40 ft; setbacks front 20 / side 5 / rear 20 ft), the NC Building Code, and Gaston County building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE** — max slope 13.1% (<15%), outside the floodplain, with road frontage. A single-family residence can be constructed subject only to standard permits and any site-specific utility/drainage conditions.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **13.1%** · Center elevation: **216.7 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities (county)	Unknown — current fee not verified
Sewer tap	Two Rivers Utilities (county)	Unknown — current fee not verified
Building permit	Gaston County	\$990 minimum; valuation-dependent
- Unknown — the selected Two Rivers Utilities page returned HTTP 404 during Firecrawl retrieval, so current water/sewer tap fees and parcel-level service availability were not verified.		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Parcel-specific school assignments and commute time are Unknown; verify addresses with the school district and route the actual site to intended employment centers.

16. Market Analysis

Conclusion: The Stanley (28164) residential market displays healthy demand for single-family new construction, supported by near-list pricing (strong sale-to-list), a median **68 days on market** (2.94% slower YoY (68 avg DOM)), and ~140 active listings. - **County trend (Gaston County):** Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28164 market trends:** 140 active listings, median list price **\$379,999**, median **68 days on market** (2.94% slower YoY (68 avg DOM)), ~98% sale-to-list ratio, 2.7 months of supply (*Realtor.com Stanley, NC Housing Market (140 listings, median list \$379,999, 68 DOM, 98% sale-to-list); Bankrate (2.7-mo supply)*). - **New-construction pricing benchmark (this address/subdivision):** recent adjacent new-construction closed sales range **\$544,990–\$775,000**, ranging \$173–\$243/sq ft, establishing an After-Repair benchmark of ~**\$490,000–\$853,000** for a ~3,130 sq ft home [Verified]. - **Vacant-land listing benchmark:** Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified. - Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	0	—	—	—
5 mi	12	\$618,995	\$205	\$49,520–\$92,849
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 12 closed sales.				

17. Market Saturation & Absorption by Product Type

Conclusion: Single-family detached dominates the 28164 (Stanley) market; a new townhome community (Autumn Brook) adds attached inventory in an otherwise rural subdivision submarket. Inventory & absorption breakdown by product type (ZIP 28164):

Product type	Active listings	Months of supply	Market dynamics & saturation level	Source
Single-family detached	~100 of 140	2.7	Balanced/warm; dominant new-build product	Realtor.com Stanley
Townhome / attached	~37 city-wide (incl. new Autumn Brook)	~2.5	Low inventory; new attached builds absorbing	Zillow Stanley townhomes
Condo	~near-zero — virtually non-existent in this rural submarket	n/a	Saturated/soft where present	Observed
Multifamily / rental	n/a	n/a	Rental-demand driven; not a for-sale product here	n/a
- Source: Realtor.com Stanley (68 DOM, 98% sale-to-list); Bankrate (2.7-mo supply); Zillow Stanley townhomes (~37)				
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; in these rural subdivision submarkets condo product should be avoided and attached product kept secondary.				

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **12** sold comps:

#	Address	Type	Year Built	SqFt	Sold Date	Sold Price	\$/SqFt	Google Driving Mi	Straight-Line Mi	Type Evidence	Zoning Match	Verified
1	7025 Stella Pl, Lowesville, NC 28164	Single-Family	2025	2,612	2025-09-05	\$548,990	\$210	3.10	2.56	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache

7	7024 Stella Pl, Stanley, NC 28164	Single-Family	2025	2,850	2025-08-22	\$574,990	\$202	3.40	2.32	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache
8	7065 Stella Pl, Stanley, NC 28164	Single-Family	2025	2,517	2026-02-10	\$551,990	\$219	3.40	2.32	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache
9	1268 Carrington Dr, Stanley, NC 28164	Single-Family	2025	3,313	2026-05-07	\$654,900	\$198	4.48	3.21	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache
10	1284 Carrington Dr, Stanley, NC 28164	Single-Family	2026	3,940	2026-02-19	\$775,000	\$197	4.50	3.19	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache
11	1288 Carrington Dr, Stanley, NC 28164	Single-Family	2026	2,611	2026-02-24	\$595,602	\$228	4.52	3.19	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache
12	1292 Carrington Dr, Stanley, NC 28164	Single-Family	2025	3,130	2025-12-05	\$678,266	\$217	4.53	3.17	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache

Bottom Line: 12 successfully routed verified new-construction closings averaging **\$618,995** (avg **\$205/sqft**), ranging \$544,990–\$775,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app's internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. It is a scenario baseline, not independently verified market evidence; obtain current parcel-specific contractor bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200

Line item	Baseline (1,600 sq ft)
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Internal underwriting scenario: scaled to the comps' median 2,990 sq ft at \$185/sq ft, modeled hard cost ≈ \$553,150 ; this intentionally conservative scenario is separate from the retrieved regional benchmark and requires bid validation. Add soft/selling/financing and site-specific costs before relying on residual land value.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (R-1), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: land value is bracketed by the 8–15%-of-ARV land band and the residual pro forma (Section 23), then cross-checked against the tax assessor. A current vacant-land listing benchmark was not verified.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$49,520–\$92,849
Whole-parcel value (band × 923 lots)	\$45,706,960–\$85,699,627
Implied per-acre (single-lot basis)	\$117–\$219
Builder residual land value @ 20% profit	\$-196,242/lot
Assessed land value (tax)	\$3,683,090
Vacant-land market (listings)	Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified.
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6] **Internal scenario:** the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. Residual land value pro forma — ARV \$618,995 (median comp), 2,990 sq ft home @ \$185/sq ft, 923 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$618,995	\$553,150	\$138,288	\$92,849	\$-165,292
20%	\$618,995	\$553,150	\$138,288	\$123,799	\$-196,242
25%	\$618,995	\$553,150	\$138,288	\$154,749	\$-227,191
- At 20% profit, residual land = \$-196,242/lot ≈ -31.7% of ARV.					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Excellent**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~923 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 12-comp market, and subdivision lot yield.

Research retrieval limitations:

- Selected utility page returned HTTP 404; no utility fee claim was verified.
- User-facing listing page returned HTTP 403 (Akamai WAF) to Firecrawl AND to the browser-act stealth-extract fallback. No single-page claim was verified; the vacant-land per-acre range is cross-sourced from search-indexed Land.com/LandSearch listing data (see the vacant_land_market claim).

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning + Firecrawl evidence retrieval).

Land Feasibility Report — OLD NC 27 HWY (Mount Holly, NC)

Feasibility Rating: **Good** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **315.60-acre vacant parcel** at OLD NC 27 HWY, Mount Holly, NC (Parcel ID **205074**, PIN 3588-86-7557), zoned **R-1 — R-1 Single Family Limited** under Gaston County. Recorded owner: **CATAWBA LANDS CONSERVANCY**. **Buildability verdict:** the parcel is **moderate** — outside the FEMA special flood hazard area, with road frontage and a max slope of **20.8%** (center elevation 195.0 m). Zoning permits **Single-Family** residential use at a minimum lot of **15,000 sq ft** and a density of 2.0 du/ac.

Subdivision potential: at the current district standards the tract yields **687 buildable lots** (gross 916 before 75% infrastructure efficiency).

Market anchor: 68 successfully routed, verified sold new-construction comps average **\$394,205**; the 8–15% land-value band is **\$31,536–\$59,131 per finished lot** (\$21,665,232–\$40,622,997 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-178,355/lot** (-45.2% of ARV) — cross-checked in Section 23.

Overall rating: **Good — Pursue**.

2. Property Overview

PIN	3588-86-7557
Owner of record	CATAWBA LANDS CONSERVANCY
Mailing address	2400 PARK RD LOWR, CHARLOTTE, NC 28203-6140
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- District:** **R-1** — R-1 Single Family Limited
- Jurisdiction:** Gaston County · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- Permitted uses:** single-family detached, modular home, accessory uses
- Allowed building types:** Single-Family

Dimensional standards (adopted):

Standard	Value
Minimum lot area	15,000 sq ft
Minimum lot width	40 ft
Density	2.0 du/ac
Maximum height	45 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	20 ft
- Minimum lot area is 15,000 sq ft for lots served by both public water and sewer; larger minimums apply where septic/well is used.	
- Minimum lot width applies only to lots containing a detached single-family dwelling (40 ft).	
- Maximum building height: 3 stories, not to exceed 45 ft.	
- Source (adopted standards): Gaston County Unified Development Ordinance, Ch. 8 (Dimensional Standards) — https://cms3.revize.com/revize/gastoncounty/Documents/planning/UDO2018/0201Ch8_Suppl1017.pdf	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Verified: Gaston County publishes a 2035 Comprehensive Land Use Plan; the subject parcel's map designation was not verified in this retrieval and must be confirmed on the adopted map.[1]
- Unknown — the county plan page was retrieved, but the subject parcel's adopted future-land-use map designation was not established from the page content.
- Confirm the adopted map designation before concluding whether the current R-1 district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** R-1 (R-1 Single Family Limited) at 2.0 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	315.60 acres
Minimum lot size	15,000 sq ft
Gross (theoretical) lots	916
Infrastructure efficiency	75%
Net buildable lots	687
- Process: Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 40 ft; setbacks front 20 / side 5 / rear 20 ft), the NC Building Code, and Gaston County building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE WITH ENGINEERING** — max slope 20.8% (15–25%) adds grading/retaining/earthwork cost; otherwise clean.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **20.8%** · Center elevation: **195.0 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities (county)	Unknown — current fee not verified
Sewer tap	Two Rivers Utilities (county)	Unknown — current fee not verified
Building permit	Gaston County	\$990 minimum; valuation-dependent
- Unknown — the selected Two Rivers Utilities page returned HTTP 404 during Firecrawl retrieval, so current water/sewer tap fees and parcel-level service availability were not verified.		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Parcel-specific school assignments and commute time are Unknown; verify addresses with the school district and route the actual site to intended employment centers.

16. Market Analysis

Conclusion: The Mount Holly (28120) residential market displays healthy demand for single-family new construction, supported by near-list pricing (strong sale-to-list), a median **47 days on market** (-18% YoY (hotness warm)), and ~126 active listings. - **County trend (Gaston County):** Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28120 market trends:** 126 active listings, median list price **\$375,000**, median **47 days on market** (-18% YoY (hotness warm)), ~99% sale-to-list ratio (*Realtor.com 28120 / Mount Holly Housing Market (median DOM 47, -18% YoY, median list \$375K, 99% sale-to-list)*). - **New-construction pricing benchmark (this address/subdivision):** recent adjacent new-construction closed sales range **\$310,000–\$559,000**, ranging \$155–\$261/sq ft, establishing an After-Repair benchmark of ~**\$279,000–\$615,000** for a ~2,135 sq ft home [Verified]. - **Vacant-land listing benchmark:** Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified. - Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	4	\$476,049	\$191	\$38,084–\$71,407
5 mi	68	\$394,205	\$189	\$31,536–\$59,131
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 68 closed sales.				

17. Market Saturation & Absorption by Product Type

Conclusion: Single-family detached dominates the 28120 (Mount Holly) market with accelerating absorption (median DOM -18% YoY); attached and multi-family inventory is small. Inventory & absorption breakdown by product type (ZIP 28120):

Product type	Active listings	Months of supply	Market dynamics & saturation level	Source
Single-family detached	~90–112 of ~126	n/a	Near-warm; DOM -18% YoY (accelerating)	Realtor.com 28120
Townhome / attached	~14 city-wide	n/a	Low inventory; minor role	Zillow / Trulia Mount Holly
Condo	~near-zero	n/a	Saturated/soft where present	Observed
Multifamily / rental	n/a	n/a	Rental-demand driven; not a for-sale product here	n/a
- Source: Realtor.com 28120 (126 listings, 47 DOM, -18% YoY); Citadel Coffield Mount Holly mix (~90 SF / 6 TH of ~99); Zillow Mount Holly townhomes (~14)				
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; in these rural subdivision submarkets condo product should be avoided and attached product kept secondary.				

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **68** sold comps:

#	Address	Type	Year Built	SqFt	Sold Date	Sold Price	\$/SqFt	Google Driving Mi	Straight-Line Mi	Type Evidence	Zoning Match	Verified
68	203 Willow St, Stanley, NC 28164	Single-Family	2026	1,332	2026-06-02	\$335,000	\$252	4.88	3.00	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI - Redfin; ok via cache

Bottom Line: 68 successfully routed verified new-construction closings averaging **\$394,205** (avg **\$189/sqft**), ranging \$310,000–\$559,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app's internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. It is a scenario baseline, not independently verified market evidence; obtain current parcel-specific contractor bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Internal underwriting scenario: scaled to the comps' median 2,135 sq ft at \$185/sq ft, modeled hard cost ≈ \$394,975 ; this intentionally conservative scenario is separate from the retrieved regional benchmark and requires bid validation. Add soft/selling/financing and site-specific costs before relying on residual land value.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (R-1), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: land value is bracketed by the 8–15%-of-ARV land band and the residual pro forma (Section 23), then cross-checked against the tax assessor. A current vacant-land listing benchmark was not verified.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$31,536–\$59,131
Whole-parcel value (band × 687 lots)	\$21,665,232–\$40,622,997
Implied per-acre (single-lot basis)	\$100–\$187
Builder residual land value @ 20% profit	\$-178,355/lot
Assessed land value (tax)	\$1,495,030
Vacant-land market (listings)	Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified.
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6] **Internal scenario:** the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. Residual land value pro forma — ARV \$394,205 (median comp), 2,135 sq ft home @ \$185/sq ft, 687 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$394,205	\$394,975	\$98,744	\$59,131	\$-158,644
20%	\$394,205	\$394,975	\$98,744	\$78,841	\$-178,355
25%	\$394,205	\$394,975	\$98,744	\$98,551	\$-198,065
- At 20% profit, residual land = \$-178,355/lot ≈ -45.2% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Slope (20.8%) adds grading/earthwork cost	Medium	Budget site-work adders; obtain a topographic survey before offer.
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Good**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~687 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 68-comp market, and subdivision lot yield.

Research retrieval limitations:

- Selected utility page returned HTTP 404; no utility fee claim was verified.
- User-facing listing page returned HTTP 403 (Akamai WAF) to Firecrawl AND to the browser-act stealth-extract fallback. No single-page claim was verified; the vacant-land per-acre range is cross-sourced from search-indexed Land.com/LandSearch listing data (see the vacant_land_market claim).

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning + Firecrawl evidence retrieval).

Land Feasibility Report — 1201 LOWELL SPENCER MOUNTAIN RD (Gastonia, NC)

Feasibility Rating: **Excellent** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **215.18-acre vacant parcel** at 1201 LOWELL SPENCER MOUNTAIN RD, Gastonia, NC (Parcel ID **314219**, PIN 3576-19-3012), zoned **SFR-4CZ — Single-Family Residential (SFR-4)** under Lowell. Recorded owner: **DRP BOOKBINDER MULTISTATE LLC**. **Buildability verdict:** the parcel is **buildable** — outside the FEMA special flood hazard area, with road frontage and a max slope of **12.0%** (center elevation 221.4 m). Zoning permits **Single-Family, Duplex** residential use at a minimum lot of **8,725 sq ft** and a density of 4.0 du/ac.

Subdivision potential: at the current district standards the tract yields **805 buildable lots** (gross 1,074 before 75% infrastructure efficiency).

Market anchor: 27 successfully routed, verified sold new-construction comps average **\$381,438**; the 8–15% land-value band is **\$30,515–\$57,216 per finished lot** (\$24,564,575–\$46,058,880 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-157,581/lot** (-41.3% of ARV) — cross-checked in Section 23.

Overall rating: **Excellent — Pursue**.

2. Property Overview

Field	Value
Address	1201 LOWELL SPENCER MOUNTAIN RD, Gastonia, NC 28056
Parcel ID / PIN	314219 / 3576-19-3012
Acres	215.18
Assessed land value	\$820,260
Total parcel value	\$820,260
Property class (code)	1001
Owner	DRP BOOKBINDER MULTISTATE LLC
Jurisdiction	Lowell

3. Parcel Verification

Field	Value
Parcel ID	314219
PIN	3576-19-3012
Owner of record	DRP BOOKBINDER MULTISTATE LLC
Mailing address	520 MADISON AVENUE, NEW YORK, NC 10022
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- District:** **SFR-4CZ** — Single-Family Residential (SFR-4) (*conditional zoning — CZ; a site-specific condition applies*)
- Jurisdiction:** Lowell · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- Permitted uses:** detached house, duplex, accessory uses
- Allowed building types:** Single-Family, Duplex

Dimensional standards (adopted):

Standard	Value
Minimum lot area	8,725 sq ft
Minimum lot width	50 ft
Density	4.0 du/ac
Maximum height	42 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	4 ft
- Minimum lot width is measured at the front street setback (50 ft for SFR-4).	
- Corner-lot side-street setback: 10 ft.	
- Maximum building height: 42 ft (pitched-roof exception per Article 9).	
- Source (adopted standards): City of Lowell Development Ordinance, Articles 8 & 9 — https://storage.googleapis.com/proudcity/lowellinc/2022/08/a6bd363e-lowell-article-8-districts-updated.pdf	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Verified: Gaston County publishes a 2035 Comprehensive Land Use Plan; the subject parcel's map designation was not verified in this retrieval and must be confirmed on the adopted map.[1]
- Unknown — the county plan page was retrieved, but the subject parcel's adopted future-land-use map designation was not established from the page content.
- Confirm the adopted map designation before concluding whether the current SFR-4CZ district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** SFR-4CZ (Single-Family Residential (SFR-4)) at 4.0 du/ac density, permitting Single-Family, Duplex.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	215.18 acres
Minimum lot size	8,725 sq ft
Gross (theoretical) lots	1,074
Infrastructure efficiency	75%
Net buildable lots	805
- Process: Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 50 ft; setbacks front 20 / side 5 / rear 4 ft), the NC Building Code, and Lowell building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE** — max slope 12.0% (<15%), outside the floodplain, with road frontage. A single-family residence can be constructed subject only to standard permits and any site-specific utility/drainage conditions.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **12.0%** · Center elevation: **221.4 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	City of Lowell	Unknown — current fee not verified
Sewer tap	City of Lowell	Unknown — current fee not verified
Building permit	Lowell	\$990 minimum; valuation-dependent
- Unknown — the selected Two Rivers Utilities page returned HTTP 404 during Firecrawl retrieval, so current water/sewer tap fees and parcel-level service availability were not verified.		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Parcel-specific school assignments and commute time are Unknown; verify addresses with the school district and route the actual site to intended employment centers.

16. Market Analysis

Conclusion: The Gastonia/Lowell (28056) residential market displays steady, balanced demand for single-family new construction, with inventory pricing near list, a median **70 days on market** (28.57% slower YoY (70 avg DOM)), and ~264 active listings. - **County trend (Gaston County):** Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28056 market trends:** 264 active listings, median list price **\$355,000**, median **70 days on market** (28.57% slower YoY (70 avg DOM)), ~97% sale-to-list ratio (*Realtor.com 28056 Housing Market (264 listings, median list \$355,000, ~70 DOM, 97% sale-to-list, trades 2.56% below list); Opendoor (83 DOM, \$349,950 median)*). - **New-construction pricing benchmark (this address/subdivision):** recent adjacent new-construction closed sales range **\$245,000–\$595,000**, ranging \$160–\$251/sq ft, establishing an After-Repair benchmark of ~**\$220,000–\$654,000** for a ~2,001 sq ft home [Verified]. - **Vacant-land listing benchmark:** Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified. - Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	15	\$385,255	\$206	\$30,820–\$57,788
5 mi	27	\$381,438	\$209	\$30,515–\$57,216
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 27 closed sales.				

17. Market Saturation & Absorption by Product Type

Conclusion: Single-family detached leads the 28056 (Gastonia/Lowell) market with active new-construction communities; attached and condo inventory is moderate in the Gastonia core. Inventory & absorption breakdown by product type (ZIP 28056):

Product type	Active listings	Months of supply	Market dynamics & saturation level	Source
Single-family detached	~240–260 of 264	n/a	Balanced; new-construction active (\$279K–\$517K)	Realtor.com 28056
Townhome / attached	~63–79 Gastonia (incl. 28052)	n/a	Moderate; growing new attached builds	Zillow/homes.com Gastonia
Condo	Moderate (Gastonia urban core)	n/a	Saturated/soft where present	Observed
Multifamily / rental	n/a	n/a	Rental-demand driven; not a for-sale product here	n/a
- Source: Realtor.com 28056 (264 listings, 70 DOM, \$193/psf, 97% sale-to-list); Zillow Gastonia townhomes (~63)/homes.com (~79, \$280K); Realtor.com Gastonia new-construction (288)				
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; in these rural subdivision submarkets condo product should be avoided and attached product kept secondary.				

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family, Duplex). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **27** sold comps:

25	894 Log Cabin Dr, Gastonia, NC 28054	Single-Family	2025	1,190	2026-01-21	\$245,000	\$206	4.65	1.71	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache

#	Address	Type	Year Built	SqFt	Sold Date	Sold Price	\$/SqFt	Google Driving Mi	Straight-Line Mi	Type Evidence	Zoning Match	Verified
26	5009 Oconee Dr, Stanley, NC 28164	Single-Family	2025	2,426	2026-04-20	\$595,000	\$245	4.86	2.76	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache
27	1600 Baymont Ct, Stanley, NC 28164	Single-Family	2025	2,001	2025-10-20	\$382,000	\$191	5.00	3.77	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache

Bottom Line: 27 successfully routed verified new-construction closings averaging **\$381,438** (avg **\$209/sqft**), ranging \$245,000–\$595,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app's internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. It is a scenario baseline, not independently verified market evidence; obtain current parcel-specific contractor bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Internal underwriting scenario: scaled to the comps' median 2,001 sq ft at \$185/sq ft, modeled hard cost ≈ \$370,185 ; this intentionally conservative scenario is separate from the retrieved regional benchmark and requires bid validation. Add soft/selling/financing and site-specific costs before relying on residual land value.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (SFR-4CZ), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: land value is bracketed by the 8–15%-of-ARV land band and the residual pro forma (Section 23), then cross-checked against the tax assessor. A current vacant-land listing benchmark was not verified.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$30,515–\$57,216
Whole-parcel value (band × 805 lots)	\$24,564,575–\$46,058,880
Implied per-acre (single-lot basis)	\$142–\$266
Builder residual land value @ 20% profit	\$-157,581/lot
Assessed land value (tax)	\$820,260
Vacant-land market (listings)	Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified.
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6] **Internal scenario:** the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. Residual land value pro forma — ARV \$381,438 (median comp), 2,001 sq ft home @ \$185/sq ft, 805 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$381,438	\$370,185	\$92,546	\$57,216	\$-138,509
20%	\$381,438	\$370,185	\$92,546	\$76,288	\$-157,581
25%	\$381,438	\$370,185	\$92,546	\$95,360	\$-176,653
- At 20% profit, residual land = \$-157,581/lot ≈ -41.3% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Excellent**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~805 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 27-comp market, and subdivision lot yield.

Land Feasibility Report — 539 QUEENSBERRY DR (Gastonia, NC)

Feasibility Rating: **Excellent**

Recommendation: **Pursue**

Generated 2026-08-14

1. Executive Summary

The subject is a **1.00-acre vacant parcel** at 539 QUEENSBERRY DR, Gastonia, NC (Parcel ID **146027**, PIN 3533-00-1105), zoned **R-1 — R-1 Single Family Limited** under Gaston County. Recorded owner: **RHOM CLARENCE R**. **Buildability verdict:** the parcel is **buildable** — outside the FEMA special flood hazard area, with road frontage and a max slope of **8.4%** (center elevation 221.1 m). Zoning permits **Single-Family** residential use at a minimum lot of **15,000 sq ft** and a density of 2.0 du/ac.

Subdivision potential: at the current district standards the tract yields **2 buildable lots** (gross 2 before 90% infrastructure efficiency).

Market anchor: 137 successfully routed, verified sold new-construction comps average **\$349,538**; the 8–15% land-value band is **\$27,963–\$52,431 per finished lot** (\$55,926–\$104,862 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-111,182/lot** (-31.8% of ARV) — cross-checked in Section 23.

Overall rating: **Excellent — Pursue.**

2. Property Overview

Field	Value
Address	539 QUEENSBERRY DR, Gastonia, NC 28052
Parcel ID / PIN	146027 / 3533-00-1105
Acres	1.00
Assessed land value	\$7,850
Total parcel value	\$510
Property class (code)	1000
Owner	RHOM CLARENCE R
Jurisdiction	Gaston County

3. Parcel Verification

Field	Value
Parcel ID	146027
PIN	3533-00-1105
Owner of record	RHOM CLARENCE R
Mailing address	5460 LEWIS RD, GASTONIA, NC 28052-9238
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- District:** **R-1** — R-1 Single Family Limited
- Jurisdiction:** Gaston County · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- Permitted uses:** single-family detached, modular home, accessory uses
- Allowed building types:** Single-Family

Dimensional standards (adopted):

Standard	Value
Minimum lot area	15,000 sq ft
Minimum lot width	40 ft
Density	2.0 du/ac
Maximum height	45 ft
Front setback	20 ft
Side setback	5 ft
Rear setback	20 ft
- Minimum lot area is 15,000 sq ft for lots served by both public water and sewer; larger minimums apply where septic/well is used.	
- Minimum lot width applies only to lots containing a detached single-family dwelling (40 ft).	
- Maximum building height: 3 stories, not to exceed 45 ft.	
- Source (adopted standards): Gaston County Unified Development Ordinance, Ch. 8 (Dimensional Standards) — https://cms3.revize.com/revize/gastoncounty/Documents/planning/UDO2018/0201Ch8_Suppl1017.pdf	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Verified: Gaston County publishes a 2035 Comprehensive Land Use Plan; the subject parcel's map designation was not verified in this retrieval and must be confirmed on the adopted map.[1]
- Unknown — the county plan page was retrieved, but the subject parcel's adopted future-land-use map designation was not established from the page content.
- Confirm the adopted map designation before concluding whether the current R-1 district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** R-1 (R-1 Single Family Limited) at 2.0 du/ac density, permitting Single-Family.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	1.00 acres
Minimum lot size	15,000 sq ft
Gross (theoretical) lots	2
Infrastructure efficiency	90%
Net buildable lots	2
- Process: Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width 40 ft; setbacks front 20 / side 5 / rear 20 ft), the NC Building Code, and Gaston County building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE** — max slope 8.4% (<15%), outside the floodplain, with road frontage. A single-family residence can be constructed subject only to standard permits and any site-specific utility/drainage conditions.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **8.4%** · Center elevation: **221.1 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- **Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- **USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- *Source: USFWS National Wetlands Inventory (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).*
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Two Rivers Utilities (county)	Unknown — current fee not verified
Sewer tap	Two Rivers Utilities (county)	Unknown — current fee not verified
Building permit	Gaston County	\$990 minimum; valuation-dependent
- Unknown — the selected Two Rivers Utilities page returned HTTP 404 during Firecrawl retrieval, so current water/sewer tap fees and parcel-level service availability were not verified.		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- **Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Parcel-specific school assignments and commute time are Unknown; verify addresses with the school district and route the actual site to intended employment centers.

16. Market Analysis

Conclusion: The Gastonia (28052) residential market displays steady, balanced demand for single-family new construction, with inventory pricing near list, a median **57 days on market** (19% slower YoY (57 DOM)), and ~382 active listings. - **County trend (Gaston County):** Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28052 market trends:** 382 active listings, median list price **\$282,000**, median **57 days on market** (19% slower YoY (57 DOM)), n/a sale-to-list ratio (*Realtor.com 28052 Housing Market (382 listings, median list \$282K, median 57 DOM, balanced market)*). - **New-construction pricing benchmark (this address/subdivision):** recent adjacent new-construction closed sales range **\$245,000–\$735,000**, ranging \$143–\$370/sq ft, establishing an After-Repair benchmark of **~\$220,000–\$809,000** for a ~1,690 sq ft home [Verified]. - **Vacant-land listing benchmark:** Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified. - Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	0	—	—	—
3 mi	10	\$435,640	\$200	\$34,851–\$65,346
5 mi	137	\$349,538	\$200	\$27,963–\$52,431
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 137 closed sales.				

17. Market Saturation & Absorption by Product Type

Conclusion: Single-family detached leads the 28052 (Gastonia) market at a steady 57-DOM pace; townhomes and new duplex builds add attached diversity within the city. Inventory & absorption breakdown by product type (ZIP 28052):

Product type	Active listings	Months of supply	Market dynamics & saturation level	Source
Single-family detached	~majority of 382	n/a	Balanced; steady 57-DOM pace	Realtor.com 28052
Townhome / attached	~79 Gastonia city-wide	n/a	Moderate; incl. townhomes & new duplex builds	homes.com Gastonia
Condo	Moderate (Gastonia urban core)	n/a	Saturated/soft where present	Observed
Multifamily / rental	n/a	n/a	Rental-demand driven; not a for-sale product here	n/a
- Source: Realtor.com 28052 (382 listings, median \$282K, 57 DOM, balanced); homes.com Gastonia townhomes (~79); new-build duplex (Orleans plan)				
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; in these rural subdivision submarkets condo product should be avoided and attached product kept secondary.				

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **137** sold comps:

Bottom Line: 137 successfully routed verified new-construction closings averaging **\$349,538** (avg **\$201/sqft**), ranging \$245,000–\$735,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app’s internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. It is a scenario baseline, not independently verified market evidence; obtain current parcel-specific contractor bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600

Line item	Baseline (1,600 sq ft)
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Internal underwriting scenario: scaled to the comps' median 1,690 sq ft at \$185/sq ft, modeled hard cost ≈ \$312,650 ; this intentionally conservative scenario is separate from the retrieved regional benchmark and requires bid validation. Add soft/selling/financing and site-specific costs before relying on residual land value.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (R-1), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: land value is bracketed by the 8–15%-of-ARV land band and the residual pro forma (Section 23), then cross-checked against the tax assessor. A current vacant-land listing benchmark was not verified.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$27,963–\$52,431
Whole-parcel value (band × 2 lots)	\$55,926–\$104,862
Implied per-acre (single-lot basis)	\$27,963–\$52,431
Builder residual land value @ 20% profit	\$-111,182/lot
Assessed land value (tax)	\$7,850
Vacant-land market (listings)	Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified.
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6] **Internal scenario:** the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. Residual land value pro forma — ARV \$349,538 (median comp), 1,690 sq ft home @ \$185/sq ft, 2 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$349,538	\$312,650	\$78,162	\$52,431	\$-93,705
20%	\$349,538	\$312,650	\$78,162	\$69,908	\$-111,182
25%	\$349,538	\$312,650	\$78,162	\$87,384	\$-128,659
- At 20% profit, residual land = \$-111,182/lot ≈ -31.8% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Excellent**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy**: Single-family residential development (subdivide to ~2 lots).
- **Primary risks**: the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers**: buildable slope, no floodplain, road frontage, verified 137-comp market, and subdivision lot yield.

Research retrieval limitations:

- Selected utility page returned HTTP 404; no utility fee claim was verified.
- User-facing listing page returned HTTP 403 (Akamai WAF) to Firecrawl AND to the browser-act stealth-extract fallback. No single-page claim was verified; the vacant-land per-acre range is cross-sourced from search-indexed Land.com/LandSearch listing data (see the vacant_land_market claim).

Generated by the NC land-feasibility pipeline (NC OneMap + FEMA + OSM + USGS 3DEP + USFWS NWI + RealtyAPI + Google Distance Matrix + county zoning + Firecrawl evidence retrieval).

Land Feasibility Report — S INMAN AVE (Bessemer City, NC)

Feasibility Rating: **Good** · Recommendation: **Pursue** · Generated 2026-08-14

1. Executive Summary

The subject is a **1.00-acre vacant parcel** at S INMAN AVE, Bessemer City, NC (Parcel ID **120981**, PIN 3516-66-0296), zoned **NR — Neighborhood Residential (NR)** under Bessemer City. Recorded owner: **CALDWELL CHAD EVERETTE**. **Buildability verdict:** the parcel is **moderate** — outside the FEMA special flood hazard area, with road frontage and a max slope of **20.2%** (center elevation 290.9 m). Zoning permits **Single-Family, Duplex** residential use at a minimum lot of **5,000 sq ft**.

Subdivision potential: at the current district standards the tract yields **6 buildable lots** (gross 8 before 75% infrastructure efficiency).

Market anchor: 70 successfully routed, verified sold new-construction comps average **\$334,119**; the 8–15% land-value band is **\$26,730–\$50,118 per finished lot** (\$160,380–\$300,708 for the whole tract).

Residual land value: a builder's residual at 20% profit is roughly **\$-180,636/lot** (-54.1% of ARV) — cross-checked in Section 23.

Overall rating: **Good — Pursue**.

2. Property Overview

Field	Value
Address	S INMAN AVE, Bessemer City, NC 28016
Parcel ID / PIN	120981 / 3516-66-0296
Acres	1.00
Assessed land value	\$3,980
Total parcel value	\$4,590
Property class (code)	1090
Owner	CALDWELL CHAD EVERETTE
Jurisdiction	Bessemer City

3. Parcel Verification

Field	Value
Parcel ID	120981
PIN	3516-66-0296
Owner of record	CALDWELL CHAD EVERETTE
Mailing address	120 S INMAN AVE, BESSEMER CITY, NC 28016
Source	NC OneMap (NC1Map_Parcels) — Verified: parcel boundary + CAMA attributes
- Parcel identity and CAMA attributes are pulled live from NC OneMap and are Verified ; the owner name is reordered first-name-first for readability.	

4. Zoning Analysis

- **District:** **NR** — Neighborhood Residential (NR)
- **Jurisdiction:** Bessemer City · **Confidence:** direct spatial match to the county/municipal zoning layer (Verified)
- **Permitted uses:** single-family detached, duplex
- **Allowed building types:** Single-Family, Duplex

Dimensional standards (adopted):

Standard	Value
Minimum lot area	5,000 sq ft
Minimum lot width	Unknown — confirm with ordinance
Density	Unknown
Maximum height	Unknown
Setbacks	Unknown — confirm with the district dimensional table
- Source (adopted standards): Bessemer City Land Development Code — https://library.municode.com/nc/bessemer_city/codes/land_development_code	
- Net buildable envelope (max building footprint and net buildable area) is computed from the surveyed lot dimensions minus the setbacks above; a conforming single-family footprint is readily accommodated on a minimum-sized lot in this district.	

5. Future Land Use Analysis

- Verified: Gaston County publishes a 2035 Comprehensive Land Use Plan; the subject parcel's map designation was not verified in this retrieval and must be confirmed on the adopted map.[1]
- Unknown — the county plan page was retrieved, but the subject parcel's adopted future-land-use map designation was not established from the page content.
- Confirm the adopted map designation before concluding whether the current NR district is consistent with long-range policy or supports higher-density entitlements.

6. Rezoning & Upzoning Opportunity

- **Current:** NR (Neighborhood Residential (NR)) at unknown density, permitting Single-Family, Duplex.
- **Upside path:** any density increase above the current district is a rezone (typically R-1 → R-2 or a residential planned-unit development) requiring a rezoning application, site plan, and public hearing; Gaston County rezoning is discretionary and evaluated against the 2035 FLU map and surrounding pattern.
- **Feasibility of upzoning:** conditional on (a) the FLU designation supporting higher density, (b) public water/sewer capacity at the site, and (c) surrounding zoning. None of these is verified here — treat any density increase as speculative until the FLU map and utility capacity are confirmed.
- **Value delta:** each additional permitted dwelling unit beyond the current density adds finished-lot value (Section 22); the rezone cost/timeline (roughly 3–9 months plus fees) must be netted against that uplift.

7. Subdivision & Lot-Split Potential

Metric	Value
Parcel area	1.00 acres
Minimum lot size	5,000 sq ft
Gross (theoretical) lots	8
Infrastructure efficiency	75%
Net buildable lots	6
- Process: Verified FY26 county fees: residential subdivision full construction-document review is \$1,371; final plat review/approval is \$373 including the initial and one re-review; a plat review after the second review is \$116.[2]	
- Value uplift: the sum of finished-lot values (Section 22 band × net lots) minus road/utility extension, survey, engineering, and stormwater cost defines the subdivision uplift over a whole-parcel sale.	

8. HOA, Deed Restrictions & Builder Requirements

- **Builder requirements (zoning ordinance):** any new construction must meet the district dimensional standards (min lot width — ft; setbacks front ? / side ? / rear ? ft), the NC Building Code, and Bessemer City building/development permits.
- **Homeowners association (HOA):** no HOA applies to this unplatted vacant tract. HOAs arise only from a recorded subdivision plat or PUD declaration, which does not exist for this parcel (public records).
- **Deed restrictions / covenants (CCRs):** none identified from public GIS/CAMA records. Architectural, approved-builder, and CCR requirements are recorded with a subdivision declaration and are **Unknown** for this unplatted parcel.

9. Buildability Assessment

- **BUILDABLE WITH ENGINEERING** — max slope 20.2% (15–25%) adds grading/retaining/earthwork cost; otherwise clean.
- Buildability thresholds (USGS 3DEP, 1 m): under 15% = Buildable; 15–25% = Requires Special Engineering; over 25% = Non-Buildable / high risk.

10. Topography and Slope Analysis

- Max measured slope: **20.2%** · Center elevation: **290.9 m** · Source: USGS 3DEP (Copernicus 30m).
- Slope drives site-work cost: a steeper tract increases grading, foundation, drainage, and driveway cost and reduces the net buildable area. A wooded/steep parcel also adds clearing and tree-removal cost per acre (Section 20).

11. Floodplain Analysis

- Outside the FEMA Special Flood Hazard Area** (Zone X; SFHA_TF = F). No flood insurance is required under the NFIP mandatory-purchase rule for this parcel, and no floodplain encroachment permit is anticipated. Source: FEMA NFHL (queried by coordinate).
- A lender may still require a flood determination at closing; Zone X (unshaded) carries minimal risk.

12. Wetlands and Environmental Constraints

- USFWS NWI: no wetland polygon mapped at the parcel coordinate.** NWI omits some small/forested wetlands, so a field delineation is the legal authority and is still recommended before disturbance.
- Source: *USFWS National Wetlands Inventory* (<https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>).
- NWI is not a substitute for a field wetland delineation; on larger tracts engage a qualified consultant before clearing/grading.

13. Utilities Analysis

Service	Provider / scenario	Est. cost
Water tap	Bessemer City / Bessemer Utilities	Unknown — current fee not verified
Sewer tap	Bessemer City / Bessemer Utilities	Unknown — current fee not verified
Building permit	Bessemer City	\$990 minimum; valuation-dependent
- Unknown — the selected Two Rivers Utilities page returned HTTP 404 during Firecrawl retrieval, so current water/sewer tap fees and parcel-level service availability were not verified.		
- Verified: Gaston County's minimum building-permit fee for a new residential home is \$990; final valuation uses the applicable ICC valuation table or stated contract price, whichever is greater.[2]		
- Utility service at the parcel, main capacity, extension cost, and any well/septic alternative remain site-specific Unknowns pending provider and environmental confirmation.		

14. Road Access and Frontage

- Has road frontage** (parcel boundary within 50 ft of a public road on the OSM network). A driveway curb-cut and any DOT/NCDOT encroachment permit are the remaining access steps; paved-vs-gravel surface is unverified.

15. School and Location Analysis

- Verified secondary-source snapshot: Gaston County Schools serves 30,959 students across 55 public schools in the 2026 school year and is rated in the bottom 50% statewide by the source's testing metric.[7]
- Parcel-specific school assignments and commute time are Unknown; verify addresses with the school district and route the actual site to intended employment centers.

16. Market Analysis

Conclusion: The Bessemer City (28016) residential market displays healthy demand for single-family new construction, supported by near-list pricing (strong sale-to-list), a median **40 days on market** (-28.07% YoY (to 40 days)), and ~148 active listings. - **County trend (Gaston County):** Verified current market snapshot: Realtor.com reports a \$345,000 median listing price, \$329,409 median sold price, 56 median days on market, and a balanced Gaston County market; FRED independently reports 56 median days on market for July 2026.[3][4] - **ZIP 28016 market trends:** 148 active listings, median list price **\$318,000**, median **40 days on market** (-28.07% YoY (to 40 days)), ~99% sale-to-list ratio, 3.5 months of supply (*Realtor.com Bessemer City / 28016 Housing Market* (median DOM 40, -28.07% YoY, 148 listings, median list \$318K, 99% sale-to-list); *Redfin 28016* (53 DOM)). - **New-construction pricing benchmark (this address/subdivision):** recent adjacent new-construction closed sales range **\$249,900–\$695,000**, ranging \$134–\$259/sq ft, establishing an After-Repair benchmark of **~\$225,000–\$765,000** for a ~1,937 sq ft home [Verified]. - **Vacant-land listing benchmark:** Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified. - Sold new-construction comps by radius (driving distance):

Radius	Comp count	Avg sold price	Avg \$/sq ft	Land band (8–15%)
1 mi	5	\$291,000	\$215	\$23,280–\$43,650
3 mi	27	\$300,103	\$184	\$24,008–\$45,015
5 mi	70	\$334,119	\$183	\$26,730–\$50,118
- Source: RealtyAPI (Realtor/Redfin/Zillow sold records) — 70 closed sales.				

17. Market Saturation & Absorption by Product Type

Conclusion: Single-family detached is the dominant product type in the 28016 (Bessemer City) market; attached and multi-family inventory is virtually non-existent in this rural subdivision submarket. Inventory & absorption breakdown by product type (ZIP 28016):

Product type	Active listings	Months of supply	Market dynamics & saturation level	Source
Single-family detached	148	3.5	Balanced/warm; steady absorption for new spec builds (40 DOM, -28.07% YoY)	Realtor.com 28016
Townhome / attached	~8	~2.8	Low inventory; restricted mainly to municipal cores	Realtor.com 28016
Condo	Unknown — unverifiable (no available data)	n/a	Saturated/soft where present	Observed
Multifamily / rental	n/a	n/a	Rental-demand driven; not a for-sale product here	n/a
<i>- Source: Realtor.com Bessemer City / 28016 (40 DOM, 148 listings, 3.5-mo supply); reference-report methodology</i>				
- Build recommendation: single-family detached absorbs fastest and matches the as-zoned use; in these rural subdivision submarkets condo product should be avoided and attached product kept secondary.				

18. Interest Rate & Financing Environment

- Verified as of August 14, 2026: Bankrate reports a 6.78% North Carolina 30-year fixed mortgage rate.[5]
- Effect on demand: higher financing costs generally reduce buyer affordability and can slow builder sell-through; parcel-specific payment effects depend on loan amount, taxes, insurance, points, and borrower qualifications.
- Sensitivity: a rate rise toward 7% would slow absorption and pressure ARV; a decline toward 6% would accelerate sales and support higher finished-lot values. Exit timing should be stress-tested at both extremes.

19. New Construction Comparable Sales Analysis

Criteria as of **2026-08-14**: verified CLOSED sales built **2025–2026**, sold from **2025-08-14 through 2026-08-14**, within 5 miles, matched to the parcel's permitted residential forms (Single-Family, Duplex). Rows are ordered closest to furthest using only successful Google Distance Matrix driving routes; unavailable Google routes sort last. All **70** sold comps:

#	Address	Type	Year Built	SqFt	Sold Date	Sold Price	\$/SqFt	Google Driving Mi	Straight-Line Mi	Type Evidence	Zoning Match	Verified
1	112 N Gould Ave, Bessemer City, NC 28016	Single-Family	2025	1,323	2026-03-12	\$262,500	\$198	0.29	0.22	single-family type published by the source	source-backed permitted use	RealtyAPI closed-sale record; RealtyAPI · Redfin; ok via cache

Bottom Line: 70 successfully routed verified new-construction closings averaging **\$334,119** (avg **\$183/sqft**), ranging \$249,900–\$695,000. A comparable new build around this site supports roughly that pricing window for ARV purposes. Confirm closed prices against the listed sources before contracting.

20. Development Cost Considerations

- Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6]
- The itemized table below is the app's internal Construction Cost Reference Model for a ~1,600 sq ft, 3-bed/2-bath crawlspace home. It is a scenario baseline, not independently verified market evidence; obtain current parcel-specific contractor bids before underwriting.

Line item	Baseline (1,600 sq ft)
Clear / grading	\$10,500
Dumpster	\$3,650
Survey / plot plan	\$1,500
Zoning & building permits	\$14,500
Tap fees (water & septic)	\$12,500
Crawlspace foundation	\$35,600
Framing package	\$20,500
Framing labor	\$10,800
Roof trusses & floor beams	\$7,400
Windows	\$6,200
Exterior doors	\$2,800
Siding (material + labor)	\$8,500
Roof (labor + materials)	\$9,400
Plumbing	\$12,500
HVAC	\$7,400
Electrical	\$7,450
Fixtures	\$1,300
Appliances	\$2,200
Insulation	\$1,900
Painting	\$3,100
Sheetrock (labor + materials)	\$7,200
Trim (labor + materials)	\$1,500
Gutters	\$1,600
Cabinets	\$4,200
Countertops	\$8,700
Cleaning	\$150
Landscaping	\$1,250
Floors	\$8,400
Driveway & patio	\$8,800
Contingency	\$3,500
Builder fee	\$25,000
Total hard cost	\$250,000
- Internal underwriting scenario: scaled to the comps' median 1,937 sq ft at \$185/sq ft, modeled hard cost ≈ \$358,345 ; this intentionally conservative scenario is separate from the retrieved regional benchmark and requires bid validation. Add soft/selling/financing and site-specific costs before relying on residual land value.	
- Always carry a builder fee and a 5–10% contingency.	

21. Highest and Best Use

- **Single-family residential development** — as currently zoned (NR), single-family detached is the highest and best use: it is legally permitted, physically feasible (buildable slope, no floodplain), financially feasible (comps support the ARV), and maximally productive (subdivision into conforming lots).
- If the FLU designation supports higher density (Section 5), a rezoned townhome/attached or multifamily use could represent a higher-and-better use — quantified as a value-delta in Sections 6 and 22.

22. Land Valuation

Conclusion: land value is bracketed by the 8–15%-of-ARV land band and the residual pro forma (Section 23), then cross-checked against the tax assessor. A current vacant-land listing benchmark was not verified.

Method	Value
Land band per finished lot (8–15% of avg comp)	\$26,730–\$50,118
Whole-parcel value (band × 6 lots)	\$160,380–\$300,708
Implied per-acre (single-lot basis)	\$26,730–\$50,118
Builder residual land value @ 20% profit	\$-180,636/lot
Assessed land value (tax)	\$3,980
Vacant-land market (listings)	Unknown — the selected vacant-land listing source returned HTTP 403 during Firecrawl retrieval, so a current Gaston County listing-price-per-acre range was not verified.
- Reconciliation: the 8–15% land band and the residual pro forma (Section 23) bracket the value a builder would pay; the whole-parcel figure assumes development to net lot yield, so a bulk sale should discount for infrastructure and absorption time. Obtain verified vacant-land closed sales before assigning a final market value.	

23. Builder/Developer Profitability Analysis

External benchmark: Verified secondary-source estimate: a standard 2,000-square-foot Charlotte home in 2026 is estimated at \$192,000–\$282,000, averaging about \$226,000 or \$113 per square foot. This is a regional benchmark, not a parcel-specific bid.[6] **Internal scenario:** the residual pro forma below uses the app's explicitly modeled construction assumptions to estimate what a builder could pay for land at 15/20/25% profit; it is not a contractor bid. Residual land value pro forma — ARV \$334,119 (median comp), 1,937 sq ft home @ \$185/sq ft, 6 lot(s):

Developer profit	ARV	Hard cost	Soft cost	Profit	Residual land value
15%	\$334,119	\$358,345	\$89,586	\$50,118	\$-163,930
20%	\$334,119	\$358,345	\$89,586	\$66,824	\$-180,636
25%	\$334,119	\$358,345	\$89,586	\$83,530	\$-197,342
- At 20% profit, residual land = \$-180,636/lot ≈ -54.1% of ARV .					
- Cross-check vs the ~20%-of-ARV finished-lot rule of thumb: builders typically pay ≈ 20% of ARV for a FINISHED lot; deduct site-specific adders (trees, slope, well/septic) to reach a raw-land offer, and reconcile with the three residual figures.					
- A lower profit margin (15%) lets the builder pay MORE for the land; a higher margin (25%) pays less.					

24. Risk Assessment

Risk	Severity	Mitigation
Slope (20.2%) adds grading/earthwork cost	Medium	Budget site-work adders; obtain a topographic survey before offer.
Future Land Use / upzoning unverified	Medium	Verify the parcel's FLU designation on the adopted map.
Utility availability at the address unverified	Medium	Confirm an active water/sewer main (or budget well/septic).
Wetlands / environmental not field-delineated	Medium	Order a wetland delineation before clearing/grading.
HOA / deed restrictions unknown (unplatted tract)	Low	CCRs only arise with a future subdivision declaration.
County market is balanced with 56 median days on market	Low	Stress-test ARV and absorption at higher financing costs.

25. Final Investment Recommendation

- **Pursue** — Feasibility Rating: **Good**. The parcel appears buildable and the as-zoned single-family use is supported by clean flood/frontage, buildable slope, verified comps, and a defensible land-value range.
- **Most likely strategy:** Single-family residential development (subdivide to ~6 lots).
- **Primary risks:** the items rated Medium in Section 24 (slope cost, FLU/upzoning, utilities, wetlands).
- **Strongest value drivers:** buildable slope, no floodplain, road frontage, verified 70-comp market, and subdivision lot yield.

Research retrieval limitations:

- Selected utility page returned HTTP 404; no utility fee claim was verified.
- User-facing listing page returned HTTP 403 (Akamai WAF) to Firecrawl AND to the browser-act stealth-extract fallback. No single-page claim was verified; the vacant-land per-acre range is cross-sourced from search-indexed Land.com/LandSearch listing data (see the vacant_land_market claim).
